this book constitutes the proceedings of the 8th international conference on decision support systems technologies icdsst 2022 held during may 23 25 2022 the ewg dss

series of international conference on decision support system technology icdsst is planned to consolidate the tradition of annual events organized by the ewg dss in offering a platform for european and international dss communities comprising the academic and industrial sectors to present state of the art dss research and developments to discuss current challenges that surround decision making processes to exchange ideas about realistic and innovative solutions and to co develop potential business opportunities the main aim of this year s conference is to investigate the role dss and related technologies can play in mitigating the impact of pandemics and post crisis recovery the 15 papers presented in this volume were carefully reviewed and selected from 46 submissions they were organized in topical sections as follows decision support addressing modern industry decision support addressing business and societal needs and multiple criteria approaches

this book brings together in a single volume the fields of multicriteria decision making and multiobjective optimization that are traditionally covered separately both fields have in common the presence of multiple perspectives of looking at and evaluating decisions to be taken but they differ in the number of available alternatives multicriteria approaches deal with decision processes where a finite number of alternatives have to be evaluated while in multiobjective optimization this number is infinite and the space of alternatives continuous this book is written for students of applied mathematics engineering and economics and management with no assumed previous knowledge on the subject as well as for practitioners in industry looking for techniques to support decision making the mathematical formalism is very low so that all materials are accessible to most readers nonetheless a rich bibliography allows interested readers to access more technical literature the textbook is organized in eleven chapters each corresponding to a class of about two hours a comprehensive set of examples is presented allowing for a didactic approach when presenting the methodologies each chapter ends with exercises that are designed to develop problem solving skills and to promote concepts retention

artificial intelligence ai has been much in the news recently with some commentators expressing concern that ai might eventually replace humans but many developments in ai are designed to enhance and supplement the performance of humans rather than replace them and a novel field of study with new approaches and solutions to the development of ai has arisen to focus on this aspect of the technology this book presents the proceedings of hhai2023 the 2nd international conference on hybrid human artificial intelligence held from 26 30 june 2023 in munich germany the hhai international conference series is focused on the study of artificially intelligent systems that cooperate synergistically proactively responsibly and purposefully with humans amplifying rather than replacing human intelligence and invites contributions from various fields including ai human computer interaction the cognitive and social sciences computer science philosophy among others a total of 78 submissions were received for the main conference track and most papers were reviewed by at least three reviewers the overall final acceptance rate was 43 with 14 contributions accepted as full papers 14 as working papers and 6 as extended abstracts the papers presented here cover topics including interactive hybrid agents hybrid intelligence for decision support hybrid intelligence for health and values such as fairness and trust in hybrid intelligence we further accepted 17 posters and 4

demos as well as 8 students to the first hhai doctoral consortium this year the authors of 4 working papers and 2 doctoral consortium submissions opted for not publishing their submissions to allow a later full submission resulting in a total of 57 papers included in this proceedings addressing all aspects of ai systems that assist humans and emphasizing the need for adaptive collaborative responsible interactive and human centered artificial intelligence systems which can leverage human strengths and compensate for human weaknesses while considering social ethical and legal considerations the book will be of interest to all those working in the field

in three series 1 cases at law 2 cases in equity 3 matrimonial cases
