in may 1906 the atlantic monthly commented that americans live not merely in an age of things but under the tyranny of them and that in our relentless effort to sell purchase and accumulate things we do not possess them as much as they possess us for bill brown the tale of that possession is something stranger than the history of a culture of consumption it is the story of americans using things to think about themselves brown s captivating new study explores the roots of modern america s fascination with things and the problem that objects posed for american literature at the turn of the century this was an era when the invention production distribution and consumption of things suddenly came to define a national culture brown shows how crucial novels of the time made things not a solution to problems but problems in their own right writers such as mark twain frank norris sarah orne jewett and henry james ask why and how

we use objects to make meaning to make or remake ourselves to organize our anxieties and affections to sublimate our fears and to shape our wildest dreams offering a remarkably new way to think about materialism a sense of things will be essential reading for anyone interested in american literature and culture

scaffolding is the support teachers provide students so they can successfully progress from novice to expert and is a crucial part of teaching and classroom management this exciting book explores the research behind scaffolding and adaptive teaching whilst also debunking the myths and misconceptions behind this approach drawing on evidence from cognitive science it brings together best practice of tried and tested methods of effective scaffolding across different settings and disciplines featuring practical classroom examples research evidence and case studies the chapters cover the link between cognitive science and effective scaffolding strategies using scaffolding to support literacy and oracy scaffolding in practical subjects ways to scaffold homework how to modify scaffolding for different ages and settings pitfalls to avoid when implementing scaffolding part of the teacher cpd academy series from innerdrive this is essential reading for all teachers and school leaders that want evidence based strategies which focus on impact in the classroom in sustainable and meaningful ways

a massive set of classic books includes the most influential works of literature philosophy and science in the history of the west

aristotle s categories had an unparalleled influence on the history of metaphysical speculation despite its influence however two fundamental questions remain to this day unanswered 1 how did aristotle generate his list of categories and 2 what is the relationship between aristotle s categories and his other great metaphysical system hylomorphism in this book paul studtmann develops and defends an interpretation that offers a unified and striking answer to both questions aristotle s system of categories is systematically derivable from hylomorphism which in turn is derivable from general theses about the nature of being

the measurement of nervous habits in normal children was first published in 1929 certain nervous habits such as thumb sucking nail

biting and others are among the common problems of child behavior a study of their occurrence in some seven hundred normal children on the basis of an inventory is here reported intensive study is given to the relation of such habits to family history habit formation nutritional status fatigue imitation age and sex the material should prove of interest to parents physicians psychologists and teachers one of the significant contributions is the development of a method of measurement which is applicable to any observable trait and which may in the future throw light upon many problems now difficult of solution
