Disruptions are being caused in the workplace due to the development of advanced software technology and the speed at which these technological advancements are being produced. These disruptions could take diverse forms and affect various aspects of work and the lives of entities in the workplaces and families of the individual employees. Work and family are caught in the crossfire between technological disruptions and human adaptation. Hence, there is a need to assess the overall effect that the fourth industrial revolution would have on work, employee, work-family satisfaction, and employee well-being. Future of Work: Work-family satisfaction and employee well-being in the fourth industrial revolution is a critical reference source that discusses practical solutions and strategies to manage challenges and address fears regarding the effect of the fourth industrial revolution on the future of employment and the workforce. Featuring research on topics such as corporate governance, job satisfaction, and mental health, this book is ideally designed for human resource professionals, business managers, industry professionals, government officials, policymakers, corporate strategists, consultants, work-life balance experts, human resources, software developers, business policy experts, academicians, researchers, and students.

This book critically examines gender and professional communication in the IT industry, demonstrating the value of an applied linguistics perspective in better understanding the discourses and gendering of work in the field and more broadly, drawing primarily from sociolinguistics research but also interdisciplinary lines of inquiry. Loew considers the discursive processes that contribute to the gendering of work in the IT industry. The volume features discussions of gendered hierarchies and inequalities in the workplace and the ways in which ideologies around professional competency perpetuate stereotypes of gender in IT. The book features data from business interactions and interviews with IT professionals from Switzerland, the UK, and the US and centres on agile working whose focus on regular open communication and reduced hierarchies offer opportunities to explore tensions between different gender ideologies. In engaging with these issues, Loew outlines ways forward for engaging with the theoretical, analytical, and methodological issues around the gendering of work without perpetuating binary notions of gender in professional settings. This volume will be of interest to scholars working on language and gender, professional communication, business communication, and applied linguistics.
