master s thesis from the year 2016 in the subject engineering civil engineering university of zambia course master of engineering project management language english abstract in recent years there have been a substantial number of projects conducted in the zambian construction industry due to the magnitude and complexity of many of these projects contractors have resorted to subcontracting to share responsibilities and mitigate project risks the zambian government has also invigorated the practice of subcontracting in the construction industry as it plays an important role in increasing economy viability and building capacity instead of improving project success subcontracting can act as a catalyst for poor project outcomes though there are many reasons that contribute to problems from subcontracting a poor relationship between main contractors and subcontractors can be seen as a notorious contributor affecting construction works the study aimed at investigating the relationship between the main contractors

and subcontractors in the zambian construction industry and recommend a framework that can be implemented to better the relationship the study also examined the effects of a poor interface between main contractors and subcontractors in zambia data collection techniques used included literature review interviews and questionnaire surveys the relative importance index was used to determine the ranking of the results of the study using the results adduced from the study a main contractor subcontractor non contractual partnering model was developed the study established that the relationship between main contractors and subcontractors in zambia is poor therefore needing attention interface problems were caused by payment issues poor communication unexpected price escalations and poor construction work in order to address interface problems the study found that there was need for better communication between the parties timely payments and subcontractors access to labour and machinery however the study had some limitations that need consideration when interpreting the results found the limitations included scarcity of specific literature on subcontracting in the zambian construction industry the size of the sample only being limited to lusaka nevertheless these limitations could be addressed through further studies

the book aims to meet the growing needs of construction and project management education in india context this edition discusses objectives and concerns of construction management management of resources project management network analysis contract management selection of contractors tenders and conditions of contracts legal aspects of contracts site management of works machinery used in building works quality control management safety management cost effectiveness and increasing role of computers in all spheres of design construction and management the chapter on project management provides general management practices as applied to construction management projects enlarging the focus of application of management techniques the entire text has been written in a cogent and lucid style to meet the students expectations from a basic textbook the new added appendices supplement the text the additional information like proforma for site inspection of works list of bis codes relating to construction guidelines and safety codes given in the appendices would be of immense value to any construction management consultant this book will serve as a textbook for students a companion to young professionals a source of information

for practitioners and a reference guide for project planning to all those engaged in construction industry
