the book deals with foods from the point of view of cultural practices in india each food is discussed from the point of its production processing and utilization in the indian context foods of special importance in the indian diet like pulses spices and nuts are considered at length the book gives a comprehensive account of foods and their products with regard to production composition nutritive value uses and preservation indigenous food preparations based on fermented rice and pulse milk and indian confectionery have been discussed various laws issued by the government to control food quality are highlighted food is more than nutrients in addition to nursing our body and promoting good health foods have an affect on our mind emotion and spiritual life there is of late a great awareness in the relationship of food and spiritual life hence a new chapter on nutrition health and food consciousness is included in the second edition

what are your favourite foods did you grow up liking angel delight instant mash prawn cocktail chicken kyiv and arctic rolls as the author did the 1970s were once described as the decade that good food forgot but with hindsight maybe they were the era when the push for profit price taste and convenience kick started a real interest in the food

industry and how food affects us this book explores our extraordinary food journey over the past 3 million years and details the subsequent physical and cultural evolution that has transpired because of it food has not only fuelled our evolution for millions of years but has also dictated how we live from hunter gatherers to agricultural societies to our current urban and industrialised societies it also details how our favourite foods have developed over the past millennia since the neolithic revolution the 20th century and the food production business saw the dawn of a new food era brought about by the industrial revolution this was a world with an accelerated rate of change population growth industrialised agriculture industrialised food production and environmental and sustainability concerns the more recent development of the food industry has also coincided with a dramatic shift in consumer eating habits what the world now eats and drinks has clashed with our biology to create significant changes in body composition whether these concerns are viewed from an economic social political or individual perspective our present food model needs to change direction the final chapters discuss our current situation regarding food systems and individual health they examine how a deeper understanding of our dna microbiome genotypes and phenotypes could be integrated with rapid technological advancements and human ingenuity a combination that has the potential to establish a far more sustainable and environmentally friendly food system for both present and future indisputably food and its production matter to everyone on the planet as our history shows they always have

in this very short introduction prof lord john krebs provides a brief history of human food from our remote ancestors 3 million years ago to the present day by looking at the four great transitions in human food cooking agriculture processing and preservation he considers a variety of questions including why people like some kinds of foods and not others how your senses contribute to flavour the role of genetics in our likes and dislikes and the differences in learning and culture around the world in turn he considers aspects of diet nutrition and health and the disparity between malnutrition in some places and overconsumption in others finally he considers some of the big issues the obesity crisis sustainable agriculture the role of new technologies such as genetic modification of crops and ends by posing the question how will it be possible to feed a population of 9 billion in 2050 without destroying our natural environment about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

approx 3876 pages approx 3876 pages

the story of cuisine and the social history of eating is a fascinating one and maguelonne toussaint samat covers all its aspects in this classic history new expanded edition of a classic book originally published to great critical acclaim from raymond blanc the new york times the sunday telegraph the independent and more tells the story of man's relationship with food from earliest times to the present day includes a new foreword by acclaimed food writer betty fussell a preface by the author updated bibliography and a new chapter bringing the story up to date new edition in jacketed hardback with c 70 illustrations and a new glossy color plate section indispensable and an endlessly fascinating book the view is staggering not a book to digest at one or several sittings savor it instead one small slice at a time accompanied by a very fine wine new york times this book is not only impressive for the knowledge it provides it is unique in its

integration of historical anecdotes and factual data it is a marvellous reference to a great many topics raymond blanc quirky encyclopaedic and hugely entertaining a delight sunday telegraph it's the best book when you are looking for very clear but interesting stories everything is cross referenced to an extraordinary degree which is great because the information given is so complex and interweaving the independent a history of food is a monumental work a prodigious feat of careful scholarship patient research and attention to detail full of astonishing but insufficiently known facts times higher education supplement

an award winning kitchen classic for over 35 years and hailed by time magazine as a minor masterpiece when it first appeared in 1984 on food and cooking is the bible which food lovers and professional chefs worldwide turn to for an understanding of where our foods come from what exactly they're made of and how cooking transforms them into something new and delicious for its twentieth anniversary harold mcgee prepared a new fully revised and updated edition of on food and cooking he has rewritten the text almost completely expanded it by two thirds and commissioned more than 100 new illustrations as compulsively readable and engaging as ever the new on food and cooking provides countless eye opening insights into food its preparation and its enjoyment on food and cooking pioneered the translation of technical food science into cook friendly kitchen science and helped birth the inventive culinary movement known as molecular gastronomy though other books have been written about kitchen science on food and cooking remains unmatched in the accuracy clarity and thoroughness of its explanations and the intriguing way in which it blends science with the historical evolution of foods and cooking techniques among the major themes addressed throughout the new edition are traditional and modern methods of food production and their influences on food quality the great diversity of methods by which people in different places and times have prepared the same ingredients tips for selecting the best ingredients and preparing them successfully the particular substances that give foods their flavors and that give us pleasure our evolving knowledge of the health benefits and risks of foods on food and cooking is an invaluable and monumental compendium of basic information about ingredients cooking methods and the pleasures of eating it will delight and fascinate anyone who has ever cooked savored or wondered about food
