systems and decision making a management science approach hans g daellenbach university of canterbury christchurch new zealand traditional methods of problem solving based on the cause and effect model can no longer cope with the complex situations in which decisions have to be made today these problem situations occur within a systems context most of these systems are created and controlled by humans and it is therefore important that decision making is guided by a systematic and comprehensive methodology that helps the decision maker to make effective use of his her extensive but limited powers of reasoning systems and decision making combines contemporary systems work with operations research or daellenbach places an emphasis on developing a methodology for decision situations that lend

themselves to quantitative approaches rather than give an elementary survey of many or ms techniques it incorporates some of the learnings of soft systems methodology for more practical problem solving particularly at the problem identification and formulation stages the text also shows that the scientific component of modelling can be considerably enhanced by the use of various diagrammatic devices the second part of the book studies a number of topics important for the analyst such as how to deal with the time element with constraints with uncertainty and with multiple goals these are demonstrated by various or ms techniques systems and decision making is an excellent core text for undergraduate and graduate students of systems management science and mba courses

making a decision of any importance is never simple on the one hand specialists in decision theory do not come within the reach of most policy makers and secondly there are very few books on pragmatic decision that are not purely anecdotal in addition there is virtually no book that provides a link between decision making and action this book provides a bridge between the latest results in artificial intelligence neurobiology psychology and decision making for action what is the role of intuition or emotion what are the main psychological biases of which we must be wary how can we avoid being manipulated what is the proper use of planning how can we remain rational even if one is not an expert in probabilities perhaps more importantly for managers how does one go from decision to action so many questions fundamental to the practice of decision making are addressed this book dissects all issues that arise almost daily for decision makers at least for major decisions drawing on numerous examples this book answers in plain language and imagery all your questions the final chapter takes the form of a brief reminder everything you have to remember to be a good decision maker

building on lecture notes from his acclaimed course at stanford university james march provides a brilliant introduction to decision making a central human activity fundamental to individual group organizational and societal life march draws on research from all the disciplines of social and behavioral science to show decision making in its broadest context by emphasizing how decisions are actually made as opposed to how they should be made he enables those involved in the process to understand it both as observers and as participants march sheds new light on the decision making process by delineating four deep issues that persistently divide students of decision making are decisions based on rational choices involving preferences and expected consequences or on rules that are appropriate to the identity of the decision maker and the situation is decision making a consistent clear process or one characterized by ambiguity and inconsistency is decision making significant primarily for its outcomes or for the individual and social meanings it creates and sustains and finally are the outcomes of decision processes attributable solely to the actions of individuals or to the combined influence of interacting individuals organizations and societies march s observations on how intelligence is or is not achieved through decision making and possibilities for enhancing decision intelligence are also provided march explains key concepts of vital importance to students of decision making and decision makers such as

limited rationality history dependent rules and ambiguity and weaves these ideas into a full depiction of decision making he includes a discussion of the modern aspects of several classic issues underlying these concepts such as the relation between reason and ignorance intentionality and fate and meaning and interpretation this valuable textbook by one of the seminal figures in the history of organizational decision making will be required reading for a new generation of scholars managers and other decision makers

in the second edition of rational choice in an uncertain world the authors compare the basic principles of rationality with actual behaviour in making decisions they describe theories and research findings from the field of judgment and decision making in a non technical manner using anecdotes as a teaching device intended as an introductory textbook for advanced undergraduate and graduate students the material not only is of scholarly interest but is practical as well the second edition includes more coverage on the role of emotions happiness and general well being in decisions a summary of the new research on the neuroscience of decision processes more discussion of the adaptive value of non rational heuristics expansion of the graphics for decision trees probability trees and venn diagrams

should i have this medical treatment or that one is this computer a better buy than that one should i invest in shares or keep my money under the bed we all face a perplexing array of decisions every day thoroughly revised and updated throughout the new edition of straight choices provides an integrative account of the psychology of decision making and shows how psychological research can help us understand our uncertain world straight choices emphasises the relationship between learning and decision making arguing that the best way to understand how and why decisions are made is in the context of the learning and knowledge acquisition which precedes them and the feedback which follows the mechanisms of learning and the structure of environments in which decisions are made are carefully examined to explore their impact on our choices the authors then consider whether we are all constrained to fall prey to cognitive biases or whether with sufficient exposure we can find optimal decision strategies and improve our decision making featuring three completely new chapters this edition also contains student friendly overviews and recommended readings in each chapter it will be of interest to students and researchers in cognitive psychology behavioral economics and the decision sciences as well as anyone interested in the nature of decision making

today s world is complex and getting more so each day huge multinational corporations international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today s decision might create because most people have never really been trained in how to make important complex decisions most people rely on experience and gut reaction which is okay for many decisions but not okay for decision that will have meaningful impact on organizations and individual decision makers need to develop the art and science of strategic decision making here professor thomas martin explains the need for decision makers to

modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps this approach requiring thinking modification will lengthen the process make it more complex and to some more arduous but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making in this book dr martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution for each of these situational states martin develops an identical five step process to determine the best decision to make the steps of this process include change needing situational analysis challenge framing causal analysis generating solution ideas choosing a solution set implementation and aftermath planning this book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions
