making energy markets charts the emergence and early evolution of electricity markets in western europe covering the decade from the late 1980s to the late 1990s liberalising electricity marked a radical deviation from the established paradigm of state controlled electricity systems which had become established across europe after the second world war by studying early liberalisation processes in britain and the nordic region and analysing the role of the eec the book shows that the creation of electricity markets involved political decisions about the feasibility and desirability of introducing competition into electricity supply industries competition introduced risks so in designing the process politicians needed to evaluate who the likely winners and losers might be and the degree to which competition would impact key national industries reliant on cross subsidies from the electricity sector in particular coal mining nuclear power and energy

intensive production the book discusses how an understanding of the origins of electricity markets and their political character can inform contemporary debates about renewables and low carbon energy transitions

hundreds of million tonnes of agricultural and food waste are produced each year around the world most of which is just that waste anaerobic digestion biogas and the heat and electricity that can be produced from it is still a nascent industry in many countries yet the benefits of ad spread throughout the community gives good financial returns to farmers and eco entrepreneurs helps community leaders meet various policies and legislative targets offers an environmentally sensitive waste disposal option provides a local heat and power supply creates employment opportunities reduces greenhouse gas emissions as well as providing an organic fertilizer although the process of ad itself is relatively simple there are several system options available to meet the demands of different feedstocks this book describes in simple easy to read language the five common systems of ad how they work the impact of scale the basic requirements the costs and financial implications and how to get involved in this rapidly growing green industry

energy price comparison websites play an important role in helping consumers to make informed decisions about switching energy supplier in order to fulfil this role the websites must be trusted by consumers and be fully transparent about the service they provide in the last year there has been growing criticism about the way in which some of these comparison websites operate the committee has been alarmed by suggestions that some comparison websites have been hiding the best deals from consumers by concealing tariffs from suppliers that do not pay the website a commission the committee concludes that all deals should be made available by default to the consumer and strongly objects to any attempt to lure consumers into choosing particular deals by the use of misleading language the committee also recommends that as an immediate and essential first step towards rebuilding confidence compensation should be provided to those consumers who were encouraged to switch to a tariff that was not the cheapest or most appropriate for their needs
