today's world is complex and getting more so each day huge multinational corporations international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today's decision might create because most people have never really been trained in how to make important complex decisions most people rely on experience and gut reaction which is okay for many decisions but not okay for decision that will have meaningful impact on organizations and individual decision makers need to develop the art and science of strategic decision making here professor thomas martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps this approach requiring thinking modification will lengthen the process make it more complex and to some more arduous but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making in this book dr martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution for each of these situational states martin develops an identical five step process to determine the best decision to make the steps of this process include change needing situational analysis challenge framing causal analysis generating solution ideas choosing a solution set implementation and aftermath planning this book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions

intended for first year graduate courses in heat transfer including topics relevant to aerospace engineering and chemical and nuclear engineering this hardcover book deals systematically and comprehensively with modern mathematical methods of solving problems in heat conduction and diffusion includes illustrative examples and problems plus helpful appendixes 134 illustrations 1968 edition

a survey of the present status of theory in the field of slip flow aerodynamics leads to the conclusion that the navier stokes equations of motion together with first order velocity slip and temperature jump at any boundary are sufficient insofar as experimental confirmation is available the use of the burnett terms in the equations of motion as well as second order terms in boundary conditions does not seem justified at least for semirarified gas flows further kinetic theoretical study and additional experimental data are urgently needed

much has changed in warfare in recent years with america now dominant on the international scene and terrorism the new enemy in light of these changes the need for moral grounding in military actions is a more pressing concern than ever when it was originally published moral issues in military decision making reflected the concerns posed by nuclear stalemate and the lessons of vietnam in that highly praised work anthony hartle outlined the essential elements of the professional military ethic created for american military forces in this new edition he reexamines the moral foundations for america s military leadership in the post 9 11 era considering world affairs since the first edition the gulf war bosnia afghanistan iraq 9 11 and the emergence of the united states as an unrivaled military power hartle explains how these events have raised ethical issues that differ dramatically from those of the cold war by the war on terrorism homeland defense asymmetric warfare the proliferation of american military interventions and the un s role in peacekeeping operations using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields in this revision hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research in a new chapter on human rights he relates moral principles directly to values embedded in the constitution and argues that overwhelming american military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of america s citizens and borders his book demonstrates that the american military must continue to observe those principles in order to be effective in its primary mission
