a monumental and accessible global history of the second half of the twentieth century from the end of world war two to the terrorist attack on the twin towers offering readers the most complete portrait of the age available

sun mankind s future source of energy volume one contains the proceedings of the international solar energy society congress held in new delhi india in january 1978 the papers review the significant advances that have been made with regards to solar energy as a resource for the future along with the scientific and technological problems associated with its optimal use for various applications the social and economic issues concerning solar technology are also discussed comprised of 416 chapters this volume begins with an assessment of national and international plans and programs for solar energy utilization including those of the united nations europe the united states and developing countries the next sections examine the economic policy social and implementation aspects of solar energy together with solar radiation and energy storage photovoltaics including space power and photochemistry are also investigated other issues that are discussed in relation to solar energy are photobiology and biomass flat plate collectors concentrating systems solar heating and cooling including water and swimming pool heating thermal power systems such as ocean thermal gradient systems wind power and agricultural and industrial applications this monograph will be of interest to scientists technologists social scientists and energy policy makers and planners

three powerful billionaires devise a sinister plan to alter the human gene limiting life

expectancy to 65 years one is the president of the usa another is the founder of a leading space company colonizing mars and the third is a tech magnate turned philanthropist in medical research if successful their scheme would lead to the deaths of over 700 million people within five years erasing anyone above 65 from existence claiming this is to save mankind their true motives remain suspect the world unites to stop them but the outcome is uncertain if they succeed how will this reshape society the economy and humanity itself are these billionaires truly working for the greater good or will their actions plunge the world into chaos the future of mankind hangs in the balance

vols 1 3 are reissues of the proceedings of the 3d 4th annual meetings and 1st western regional meeting of the american astronautical society

life and living is a complex system interwoven in reality and fantasy happiness and sadness but always fusing with one s dreams in the spirit of the creator the wilderness and one s special quest for his or her ridge join me in my six stories of reality and fantasy in my own quest for the ridge

this is a critical time for the space program and for all of us even the significant steps that we have taken since the dawn of the space age in 1957 including orbital flight the moon landings and orbiting space stations will in retrospect seem to be tiny steps compared to what lies ahead migrating into space will challenge us beyond anything we have previously accomplished and we are destined to face adventures that are both fantastically breathtaking and supremely dangerous beyond earth is for everyone interested in humankind s next great adventure the human settlement of the solar system a unique collection of world class scholars scientists engineers managers astronauts artists authors and professors examine the key questions of our unique circumstance at the dawn of a new era in space exploration and development why does

space matter to us what can we use it for how can we get there efficiently what will ordinary life be like in space what will our homes be like on the moon on mars in orbit will we play will we love the book does not stop with questions it goes beyond the dramatic the superficial and the overly technical to the prescriptive literally laying the brick and mortar for our future space faring civilisation contributing authors come from both hard and soft sciences include education and the arts and ask children who will be the future space dwellers for their visions they document needed research there are three underlying assumptions driving this book first that the human urge for flight exploration and survival plus its curiosity about the universe are deeply embedded in our genes and in our minds second that even if these urges were ignored the continual improvement of the quality of life for the human race on earth and perhaps even its ultimate survival hinge on the successes of human exploration and habitation of space and third that our generation can use the opportunity presented by outwards expansion to design a rewarding and exciting future of collaboration to capitalise on the lessons learned from human history on earth

a weekly review of politics literature theology and art

When somebody should go to the books stores, search start by shop, shelf by shelf, it is really problematic. This is why we give the books compilations in this website.
