is journal impact factor a good measure of research merit this question has assumed a great importance after the notification of the university grants commission minimum qualifications for appointment of teachers and other academic staff in universities and colleges and measures for the maintenance of standards in higher education regulations 2009 on september 23rd 2009 now publication of research papers articles in reputed journals has become an important factor in assessment of the academic performance of teachers in colleges and universities in india one of the measures of reputation and academic standard rank or importance of a journal is the so called impact factor this study makes a detailed statistical analysis of journal impact factors across the disciplines it finds that if journal impact factor is used to assess the academic performance of individuals for the purpose of selection promotion etc and it is not borne in mind that due to vast differences in the nature of distribution of impact factors across the disciplines they are not justifiably comparable a below average scholar in the one discipline will rank higher and will be honored and benefitted more than another scholar in some other discipline wherein the journal impact factor is adversely skewed it may be noted that in the university departments there are specializations with low impact factor journals and other specializations with very high impact factor journals but the teachers researchers of different specializations in the departments compete with each other for promotion in this milieu the researchers with an unfortunate specialization wherein the journal impact factor is mingy or adversely skewed would receive injustice is plainly predetermined therefore a measure such as the h index which quantifies the quality as well as productivity of an individual author scholar would be more appropriate than the journal impact factor the h index may be fine tuned and hence the g index or tol s index may be used nevertheless even the h index and the tol s index would not be appropriate to the purpose of inter disciplinary or inter specialization comparisons a more informed and balanced judgment of the expert committee for selection appointment and promotion purposes will continue to be extremely important

scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of

a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011

principles practice

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

no 2 pt 2 of november issue each year from v 19 1963 47 1970 and v 55 1972 contain the abstracts of papers presented at the annual meeting of the american society for cell biology 3d 1963 10th 1970 and 12th 1972

a guide to journal citation reports jcr aims at explaining jcr completely the present book defines and gives information about journal title total cites total articles cited half life impact factor five year impact factor median impact factor aggregate impact factor immediacy index aggregate immediacy index aggregated cited half life number of journals in category number of articles in category

in this short paper we recall the garfield impact factor of a journal we improve and extend it and eventually present the total impact factor that reflects the most accurate impact factor
