in 1877 university professor carl von linde obtained a patent for his refrigerator from the imperial patent office a patent for something that was not merely an invention but the result of serious research in the basic laws of physics linde went on to found

the linde company one of the biggest german gas and engineering companies which became one of the models for science based industries today the linde group headquartered in wiesbaden germany is a global technology company dedicated to gas and engineering material handling and refrigeration this book examines the history of this company in the context of the history of technology in industry

interfacial phenomena driven by heat or mass transfer are widespread in science and various branches of engineering research in this area has become quite active in recent years attributable in part at least to the entry of physicists and their sophisticated experimental techniques into the field until now however the field has lacked a readable account of the recent developments interfacial phenomena and convection remedies this problem by furnishing a self contained monograph that examines a rich variety of phenomena in which interfaces play a crucial role from a unified perspective that embraces physical chemistry fluid mechanics and applied mathematics the authors study recent developments related to the marangoni effect including patterned convection and instabilities oscillatory wavy phenomena and turbulent phenomena they examine Bénard layers subjected to transverse and longitudinal thermal gradients and phenomena involving surface tension gradients as the driving forces including falling films drops and liquid bridges it is only in the past two or three decades that researchers have performed suitable clear cut experiments involving interfacial phenomena and the stage is now set for a virtual explosion of the field interfacial phenomena and convection will bring you quickly up to date on the advances realized and prepare you to both use the results and to make further advances

this handbook is the only up to date a to z compilation of commercial and research zeolites the volume presents complete patent researched reference information on structural data synthesis parameters and characteristic properties for each known zeolite there is an entry on all organics which crystallize a given structure physical data and applications data is presented in tabular or graphical form with minimal text and a cross referenced literature review is provided

this book reviews the interconnection of cosmology and particle physics over the last decade it provides introductory courses in supersymmetry superstring and m theory responding to an increasing interest to evaluate the cosmological consequences of these theories based on a series of extended courses providing an introduction to the physics of the very early universe in the light of the most recent advances in our understanding of the fundamental interactions it reviews all the classical issues inflation primordial fluctuations dark matter baryogenesis but also introduces the most recent ideas about what happened at the big bang and before

the first south asian edition of the linde's operative gynecology has been thoroughly edited to suit the needs of students and practitioners in south asian countries keeping in mind the rapidly changing concepts in operative gynecology this globally acclaimed textbook guides the reader through the well illustrated techniques of gynecological surgeries salient features of the south asian edition keeping the essence of the text all the chapters have been updated and revised to adapt to local practices and conditions in south asian countries features like stepwise approach to perform gynecologic operations and best surgical practices that are important components of each chapter have been retained and updated wherever necessary data from recent trials latest staging and classifications of cancers have been included in oncology chapters indian data pertaining to common gynecological conditions and cancers have been incorporated medicolegal laws in india which have a bearing on day to day practice of obstetrics and gynecology have been included in relevant chapters in the chapter tubal sterilization detailed preoperative evaluation selection criteria and statistics from indian perspective have been incorporated government of india guidelines for postpartum sterilization are also included recent advances in robotic surgery in india and a note on robotic assisted laparoscopic hysterectomy have been included content has been thoroughly peer reviewed by subject experts of national repute

this textbook provides graduate students with a thorough and up to date introduction to inflationary cosmology enormous progress has been made in this area in the last few years and this book is the first to provide a modern and unified overview it covers all aspects of inflationary cosmology and carefully compares predictions with the latest observations including those of the cosmic microwave background the clustering and velocities of galaxies and the epoch of structure formation problems are included throughout to help the student to develop a thorough understanding with the host of international experiments currently being performed and planned for the near future including nasa's map satellite and the european space agency's planck mission inflationary cosmology promises to be one of the most exciting and fruitful topics of research in science in the next decade this book provides graduate students with the ideal introduction

it is generally felt in the cosmology and particle astrophysics community that we have just entered an era which later can only be looked back upon as a golden age thanks to the rapid technical development with powerful new telescopes and other detectors

taken into operation at an impressive rate and the accompanying advancement of theoretical ideas the picture of the past present and future universe is getting ever clearer some of the most exciting new findings and expected future developments are discussed in this invaluable volume the topics covered include the physics of the early universe and ultra high energy processes emphasis is also put on neutrino physics and astrophysics with the evidence for non zero neutrino masses emerging from both solar neutrinos and atmospheric neutrinos covered in great depth another field with interesting new results concerns the basic cosmological parameters where both traditional methods and the potential of new ones like deep supernova surveys and acoustic peak detections in the cosmic microwave background are thoroughly discussed various aspects of the dark matter problem such as gravitational lensing estimates of galaxy masses cluster evolution and hot cluster electron distortions of the thermal microwave background spectrum are also discussed as are particle physics candidates of dark matter and methods to detect them cosmic rays of matter and antimatter are included as a topic and so is the problem of the enigmatic dark energy of the vacuum

the field of female pelvic medicine and reconstructive surgery is one of the fastest growing subspecialties in medicine since becoming a subspecialty in 1997 the need for up to date information on topics included in this specialty has routinely been the feedback received by residents fellows and gyn surgeons this product will incorporate surgical procedures from urology gynecology and colorectal surgery and focus on step by step illustrative techniques while specialists perform many of the procedures included in this text each year in general practices these procedures are done rela

with expert guidance on all aspects of gynecologic surgery te linde s operative gynecology thirteenth edition edited by drs linda van le and victoria l handa remains your go to resource from preoperative to postoperative care comprehensive step by step instructions on how to perform all contemporary gynecologic procedures updated diagnostic and management approaches a greatly expanded illustration program and new procedural videos edited by dr danielle patterson make this classic text an ideal reference for trainees as well as experienced practitioners

this widely respected and frequently consulted reference work provides a wealth of information and guidance on industrial chemistry and biotechnology industries covered span the spectrum from salt and soda ash to advanced dyes chemistry the nuclear industry the rapidly evolving biotechnology industry and most recently electrochemical energy storage devices and fuel cell science and technology other topics of surpassing interest to the world at large are covered in chapters on fertilizers and food production pesticide manufacture and use and the principles of sustainable chemical practice referred to as green

chemistry finally considerable space and attention in the handbook are devoted to the subjects of safety and emergency preparedness it is worth noting that virtually all of the chapters are written by individuals who are embedded in the industries whereof they write so knowledgeably

in their subject matter and in their theoretical orientation all the papers in this volume reflect the powerful influence of t givón most of them deal with questions of morphosyntactic typology pragmatics and grammaticalization theory many of them are directly based on extensive fieldwork on local languages of the americas africa asia and the pacific others are based on statistical analyses of extensive written and spoken corpora of texts
