a comprehensive introduction to the ancient civilizations that arose in the mediterranean basin with special emphasis on how geographical features shaped their development the book is divided into three sections the eastern empire greece and rome in the first section the reader encounters the civilizations of egypt chaldaea assyria phoenicia and persia learning not only the basis of each civilization but how they interacted with each other and how they changed over time in the second section on greece the rivalry between athens and sparta is highlighted showing clearly the highly divergent cultures of athens and sparta followed by the rise of alexander the great and the conquest of asia turning to rome the reader experiences the growth of rome from its early days to the establishment of the republic then the rise of the roman empire and its eventual decline ambitions of leading figures are clearly articulated along with the strategies they used to achieve their ends throughout the narrative the author relates findings that expand our understanding of the ancient world archaeological discoveries in troy egypt and pompeii and traces the development of things as foundational to our civilization as our alphabet and our form of government this is the rare history book that is a joy to read that provokes thought on a number of levels and that uses language that is often arresting as when he repeats the words of an arabian conqueror egypt is in succession a mud field a sea of fresh water and a flower garden

this book is about christianity islam judaism and how the arabs and europeans took these afrikan religious belief systems from ancient egypt north afrika and used them during the trans sahara afrikan slave trade by the arabs in the name of allah and followed by the transatlantic afrikan slave trade by the europeans in the name of jesus to enslave the bodies minds and souls of the afrikan race this

book is about the jesus deception that has been passed on down through history by european historians that is still being taught around the world today this book takes a provocative intellectual scholastic historical cultural and sociological look at the bible this book identifies the names of the translators of the king james bible of 1611 a d and when the chapters and verses in the bible were created and who created them the purpose of this book is to expose the historical cultural sociological religious and theological lies of the europeans and the arabs this book reveals the truth of the origination of the bible as there is no religion higher than the truth join me in an intellectual odyssey through time here i feel like a lone warrior standing before a mighty army come with me on this perilous pilgrimage as we travel through a parallel universe i dedicate this book to my mother and father who gave me life to the rest of my native afrikan family for supporting me and encouraging me on this publishing venture to the heavenly father without whom none of this would be possible there are others i would also like to thank for being a part of helping me through this journey called life such as my professors at the alabama state university where many a great scholars paths i have crossed to my american family and friends in mobile alabama who nurtured and taught me from childhood to adulthood the many friends and colleagues i met in my travels all across america in my intellectual journey and last but certainly not least to my publisher for granting me the opportunity to speak to many all around the world in this forum i am eternally indebted to you all thank you

this book is the preliminary part of a great work titled the book of the egyptian the beginning of the basic egyptology or a key to the understanding of history philosophy and world religion usually the introduction is made in the form of a brief preface or foreword but i got a whole book as the first step in a multi volume publication of the study the purpose of this specific introduction as the beginning of serious research is right at the level of the opening to inspire a reader showing him in a clear visual and comprehensible form the whole true mechanism of the hieroglyphic writing to achieve this i will completely dispel the myth created by the modern science that hieroglyphs do not convey any meaning of words the whole idea but only individual sounds letters or their combination syllables this scientific myth will be finally deprived of the status of scientific knowledge and the translation of the phaistos disc on the contrary will be clearly shown what is called broken apart and will be read in the ancient hieroglyphic language united by the principle of construction in the language of the ancient egyptians i can say that it will not be two simultaneously existing systems of hieroglyphs translation as well as two egyptologies one will be false and the other true to prove the validity of the system of translation i wanted to give you immediately

not only a complete translation of the text of the phaistos disc where the number of occurrences of each hieroglyph is not big 1 to 19 times but the translation of the whole ancient egyptian writing because the number of times it is used in there is thousands if not even millions and each such use of each hieroglyph is translating in the same way so it creates the full reading of the hieroglyphic texts writing which will be easily read by everyone with the dictionary of hieroglyphs in the future the main reason why i wanted to do it is because at first i read the ancient egyptian texts and only then by chance came across with the hieroglyphs of the phaistos disc but then i decided to set a different aim to teach the reader to think and not just to read hieroglyphs since we have no ancient egyptian temple and you re not its novice the method of achieving the aims will be different than in the antiquity first of all i would suggest not a translation of ancient egyptian hieroglyphs but a complete translation of the phaistos disc and at the same time to give them a sort of test of common sense to modern science in the face of particular academies and universities of the world let them answer me the question not knowing the translations of ancient egyptian texts whether they think this translation of the phaistos disc is correct so when i completely publish the book of egyptian it will become clear who they are and where do they lead all of you as they always test the students it s a time to test them as well will they pass the test i do not know but any way you my reader will get to know about it in the main manuscript and will be able to draw your own conclusions about their intellectual level therefore i recommend you to take this message of the book at least with the attention because not every day the science gets a ready revelation designed in the form of scientific study and here the attention and common sense will help the reader to re look the original pure uncomplicated meaning of the hieroglyphs which through the veil of delusion will finally begin to appear in their true original and vibrant colors and finally get from the nether world into the realm of the living
