this book provides an evaluation of peruvian politics and economics in the 1990s on the evidence available up until the end of 1997 the purpose is twofold to detect continuities and discontinuities between the fujimori period and earlier ones and to offer an answer however tentative to the question of whether the fujimori government has laid the basis for greater future stability the answers to these questions are mixed there appear to be more continuities than many suppose even though 1990 in many ways was a turning point and while the fujimori government helped provide a more stable context than the one it inherited it is by no means clear that the changes it has brought about will prove sustainable over the longer run the political model looks particularly brittle the contributors are luis abugatt s elena alvarez javier de bela nde john crabtree carlos iv n degregori francisco durand adolfo figueroa ra l hopkins javier igu iz drago kisic enrique obando martin tanaka jim thomas and rosemary thorp john crabtree is a researcher at oxford analytica and a visiting research fellow at the institute of latin american studies university of london
