war has been an ever present feature of human existence the analysis of wars has
 tended to focus on either their causes or the military and strategic consequences of a
 conflict this book argues that war can have a much wider impact across layers of society
 that go beyond international boundaries it presents a heuristic multi disciplinary
 framework for analysing the ripple and backwash effects across five connected analytical
 layers around the world material human capabilities economic values belief and
 attitudes policy and governance and power through this framework the book introduces
 a set of empirically rich and theoretically informed studies which examine the first
 consequences of the war in ukraine following the invasion of russia in february 2022 this
 multi disciplinary approach shows that the effects of the war were much deeper and
 sustained this volume will be of interest to students and scholars of international
 humanitarian law security studies peace and conflict studies and european history the
 chapters in this book were originally published as a special issue of policy studies

a fortnightly bulletin on financial and political trends

the minority game is a physicist's attempt to explain market behaviour by the interaction between traders with a minimal set of ingredients and drastic assumptions this model reproduces market ecology among different types of traders its emphasis is on speculative trading and information flow the book first describes the philosophy lying behind the conception of the minority game in 1997 and includes in particular a discussion about the el farol bar problem it then reviews the main steps in later developments including both the theory and its applications to market phenomena minority games gives a colourful and stylized but also realistic picture of how financial markets operate
