the last decade witnessed an unprecedented annual growth of the literature dealing with the philosophy of economics as well as the first signs of an institutionalization conferences an international journal of the philosophy of economics as a scientific subject in itself in particular in the u s in 1981 a meeting took place with participants mainly of european continental origin in july 1987 we organized a second conference philosophy of economics ii at tilburg uni versity the netherlands mainly aiming at the establishment of first contacts between the middle european group and researchers from the u s the present volume contains the papers presented at this conference philosophical thought on economics in recent years split up in many different streams two of which are represented in the larger part of this volume the first of these streams was formed by a group of researchers mainly from middle europe who make empirical studies of the logical structures of the different theories as they find them presented in economic literature two methods prevail here first the structuralist method as exemplified in the writings of sneed stegmiiller and others of describing the object of a theory as a set of partial potential models such models consist of sets and relationships

between these sets which represent the concepts used in the theory

this volume brings together distinguished philosophers with interdisciplinary expertise to show how the resources of philosophy can be employed in the tasks of evaluating economics and fostering policy debates contributors offer analyses of basic ideas in economics such as the notion of efficiency economic man incentives self interest and utility maximization they discuss key concepts in political theory such as desert compensation autonomy equality consent or fairness the book then offers examples of how philosophical resources can be applied to specific timely debates such as discrimination affirmative action and ethical considerations in social security these applications demonstrate how philosophy politics and economics can be fruitfully combined while the more theoretical chapters clarify fundamental relationships across these related disciplines ultimately the text guides students and scholars in expanding their perspectives as they approach the necessarily complex research questions of today and tomorrow

philosophy and economics i treats methods and models of economic philosophy philosophy and economics ii deals with morals in both cases an effort to integrate many strands of modern philosophy and economics via decision theoretic language is made regardless of this decision theoretic background the treatment is non technical the aspiration is to sketch some tools that may be used in search of what philosophers call a wide reflective equilibrium on foundational matters of economics as well as of philosophy the presentation will enable an advanced undergraduate or beginning graduate student from fields like philosophy economics law legal philosophy and law economics political science and sociology to use the tools arguments and paradigm examples provided to search for her or his own reflective equilibrium on matters of economic philosophy specialists from the aforementioned fields may find the text useful too as an accessible account of an increasingly elaborate intellectual discourse on philosophy politics and economics

this volume is one of the most remarkable works in the history of economic thought first published in 1893 its principal significance rests in its argument that economic theory however technical or pragmatic is necessarily formed by and derives its meaning from larger moral and philosophical systems and assumptions bonar traces the inexorable presence of this moral and philosophical element in a vast though highly nuanced survey of the economic aspect of major thinkers from plato to darwin and demonstrates how modern economic thought in turn grew out of one or another branch of philosophy bonar begins with a consideration of plato and aristotle examining their conceptions of wealth production and distribution and civil society discussions of the stoics epicurians and early christianity explore complications introduced by these bodies of thought his analysis of the classical and medieval world is followed by an extensive treatment of the concept of natural law from the renaissance through the enlightenment describing its influence and its relation to ideas of natural rights the book s later sections concentrate on the dominant modes of nineteenth century thought utilitarianism idealism and materialism bonar identifies and explores the philosophical

topics on which the conduct of technical economic analysis makes assumptions human nature and human wants the nature and role of the state the relation of the individual to society the nature and origin of property and the role of ideals in socioeconomic life he concludes by examining the implications for economics of the theory of evolution arising from the work of darwin and others the continuing interest of this volume for economists philosophers and sociologists lies in bonar s contention that at the heart of the relationship of philosophy to economics is the problem of order the ongoing need to reconcile conflicts between freedom and control continuity and change hierarchy and equality in his reading the fundamental question to which philosophy and economics are both brought to bear is that of changing the structure of power and opportunity in the social economy this is in short a classic in the history of economics as well as the economic element in intellectual history
