the objective of this book is to acquaint the reader with the ways in which evaluation results can be made more credible through careful choice of a design prescribing when and from whom the data will be gathered the book helps the reader choose a design put it into operation and

analyze and report the data that has been gathered

the concepts of cause and effect are critical to the field of program evaluation experimentally designed evaluations those that randomize to treatment and control groups offer a convincing means for establishing a causal connection between a program and its effects experimental evaluation design for program improvement considers a range of impact evaluation questions particularly those questions that focus on the impact of specific aspects of a program laura r peck shows how a variety of experimental evaluation design options can provide answers to these questions and she suggests opportunities for experiments to be applied in more varied settings and focused on program improvement efforts

the golden standard evaluation reference text now in its second edition evaluation theory models and applications is the vital text on evaluation models perfect for classroom use as a textbook and as a professional evaluation reference the book begins with an overview of the evaluation field and program evaluation standards and proceeds to cover the most widely used evaluation approaches with new evaluation designs and the inclusion of the latest literature from the field this second edition is an essential update for professionals and students who want to stay current understanding and choosing evaluation approaches is critical to many professions and evaluation theory models and applications second edition is the benchmark evaluation guide authors daniel l stufflebeam and chris l s coryn widely considered experts in the evaluation field introduce and describe 23 program evaluation approaches including new to this edition transformative evaluation participatory evaluation consumer feedback and meta analysis evaluation theory models and applications second edition facilitates the process of planning conducting and assessing program evaluations the highlighted evaluation approaches include experimental and quasi experimental design evaluations daniel l stufflebeam s cipp model michael scriven s consumer oriented evaluation michael patton s utilization focused evaluation robert stake s responsive stakeholder centered evaluation case study evaluation key readings listed at the end of each chapter direct readers to the most important references for each topic learning objectives review questions student exercises and instructor support materials complete the collection of tools choosing from evaluation approaches can be an overwhelming process but evaluation theory models and applications second edition updates the core evaluation concepts with the latest research making this complex field accessible in just one book

the book s chapters provide background on how and why the cipp context input process product model was developed a detailed presentation of the model an explanation of the key role of an evaluation oriented leader who can decide what and when to evaluate detailed presentations on evaluation design budgeting and contracting procedures and tools for collecting analyzing and reporting evaluation information and procedures for conducting standards based meta evaluations evaluations of evaluations these topics are interspersed with illustrative evaluation cases in such areas as education housing and military personnel evaluation

this book is aimed at the wide audience of future systems developers which includes people working or studying such areas as business science engineering the social sciences education and the liberal arts the text provides the basic skills and understanding needed by anyone involved with systems development offering a comprehensive look at systems development from the initial stage of determining user requirements to the final evaluation of installed systems the broad scope of the book should help students and readers see the big picture of these projects making analysis and design techniques understandable within the context of the entire systems development process students should have some knowledge of computer systems beginning students will be best served by a two semester class while more advanced students should be able to cover the material in one

program evaluation embedding evaluation into program design and development provides an in depth examination of the foundations methods and relevant issues in the field of evaluation with an emphasis on an embedded approach where evaluation is an explicit part of a program that leads to the refinement of the program students will learn how to conduct effective evaluations that foster continual improvement and enable data based decision making this text provides students with both the theoretical understanding and the practical tools to conduct effective evaluations while being rigorous enough for experienced evaluators looking to expand their approach to evaluation

designing an evaluation is rather an art as each must be designed according to its appropriateness to the situation being evaluated the advantages of each feature of the design must be balanced against any sacrifices each of these choices entail designers must plan for the allocation of investigative resources selecting investigative questions that are most apt and be aware of both practical and political considerations this volume includes both new approaches to the design of educational evaluations and discusses the pros and cons of frequently used design concepts

drawing upon experiences at state and local level project evaluation and based on current research in the professional literature payne presents a practical systematic and flexible approach to educational evaluations evaluators at all levels state local and classroom will find ideas useful in conducting managing and using evaluations special user targets identified are state department of education personnel and local school system administrative personnel the volume can be used by those doing evaluation projects in the field or as a text for graduate courses at an introductory level the book begins with an overview of the generic evaluation process chapter two is devoted to the criteria for judging the effectiveness of evaluation practice chapter three addresses the all important topic of evaluation goals and objectives chapters four five and six basically are concerned with the approach framework or design of an evaluation study chapter four contains a discussion of four major philosophical frameworks or metaphors and the implications of these frameworks for conducting an evaluation chapters five and six describe predominantly quantitative and qualitative designs respectively design implementation and operational issues related to instrumentation chapter

seven management and decision making chapter eight and reporting and utilization of results chapter nine are next addressed the final chapter of the book chapter ten considers the evaluation of educational products and materials

this book from sage s evaluation in practice series considers variants of experimental evaluation designs including those that are not commonly used but could be with much greater frequency it also includes instructions for how to set up such experiments within program processes to learn about the effects of improvement efforts

the objectives of this project were to collect review and summarize current state highway department pavement procedures and develop recommendations for revisions to the aasho interim guides for the design of both rigid and flexible pavements

evaluation of design ideas is an integral part of designing built environments it involves multiple stakeholders with diverse backgrounds reviewing design solutions by studying their form and performance data although there are computational systems for supporting evaluation tasks they are either highly specialized for designers or configured for a particular workflow with limited functions i developed a design analytics method aiming at a collaborative and data driven evaluation of alternatives in the design evaluate feedback cycle adopting this approach i introduce d art as a prototype system composed of customizable interfaces for presenting design alternatives enabling stakeholders to participate in data informed discourse on alternatives and providing feedback to the design team its system design considers requirements gathered through literature review critical analysis of the existing systems and collaboration with our industry partners finally i assessed d art s design through an expert review evaluation which generally reported positive results on the system s utility

the research reported here established the foundation for a unit focused evaluation of the new infantry advanced leaders course alc formerly known as the basic noncommissioned officer course with the emphasis on transfer of training the work produced an evaluation design plan a data collection and management plan measures of alc impact the architecture for data collection instruments and a data collector s guide this document describes and characterizes each product and presents intermediate products involved in developing the impact measures it also summarizes design options considered and rejected and delineates assumptions behind the data collection strategy the primary products are included in appendixes the research paves the way for a comprehensive evaluation of infantry alc s operational impact
