Included are discussions of societal factors that influence health and healthcare, as well as controversial issues such as the necessity of surgical interventions, a critique of both traditional and commonly used alternative therapies and remedies, and a complete picture of the health care options available today.

Women and Health is a comprehensive reference which addresses health issues affecting women of all ages, adolescence through maturity. It goes far beyond other books on this topic which concentrate only on reproductive health and has a truly international perspective. It covers key issues ranging from osteoporosis to breast cancer and other cancers, domestic violence, sexually transmitted diseases, occupational hazards, eating disorders, heart disease, and other chronic illnesses, substance abuse, and societal and behavioral influences on health. Women and Health covers not only those conditions that are unique to or occur more frequently in women but also those that present differently or are treated differently in women. Key features: comprehensive in-depth review of all aspects of women's health; highlights key women's health issues including osteoporosis, domestic violence, breast cancer, menopause, infertility, heart disease, and many others; addresses international women's health issues from a human rights and cultural perspective; presents the latest research and clinical findings from leaders in their respective fields; highlights controversies in treatment modalities; challenges the medical community to address the impact of gender on health; expands our thinking about the perceptions of disease and disorders in women; challenges current status quo in health care delivery.

Nutrition and Women's Health: Functional Foods, Nutraceuticals, and Integrative Strategies delves into the critical role nutrition plays in human health, highlighting its growing importance among healthcare providers, research scientists, nutritionists, and dietitians. Despite significant progress, there remains a lack of targeted research specifically addressing women's nutritional needs at various life stages. This book aims to fill that gap, offering comprehensive insights into the benefits of nutraceuticals and functional foods for disease prevention, treatment, and recurrence through different phases of a woman's life. The book covers a wide range of topics, including nutritional modules for teenage nutrition, the interaction of sex hormones, menopause management, polycystic ovary syndrome, fertility, and bone, skin, and heart health.
