this book is a fully updated and revised second edition of a highly successful text in which a new concept of knowledge mining based on explication and transfer of interventional knowledge of experts has been implemented the dedicated training program that is set out will serve the needs of all interventional operators whether cardiologists vascular surgeons vascular specialists or radiologists enabling them to achieve a consistent expert level across the entire broad spectrum of catheter based interventions operator skills and in particular decision making and strategic skills are the most critical factors for the outcome of catheter based cardiovascular interventions currently such skills are commonly developed by the empirical trial and error method only the explicit teaching training and learning approach adopted in this book permits the rapid transfer of interventional knowledge and enables individual operators to negotiate steep learning curves and acquire complex skills in a highly efficient manner it will thereby offer invaluable assistance in meeting successfully the challenges of modern cardiovascular care

the sober explanation for this book is a call by the springer verlag london to edit a publication on the functional relevance of the collateral circulation of the heart alternatively it could be sold as the result of my intention to reduce entropy of 18 years of scientific work on the topic of the coronary circulation which was itself meant to diminish the amount of useless energy such a process of reducing disarray in a system with the aim of grasping it better is related to simplification which carries the risk of introducing error this can be exemplified by the historic view of angina pectoris which used to be simplified as being always fatal thus obscuring for nearly two centuries the view of a self healing mechanism such as the collateral circulation of the heart it would be naive to assume the present work to be free of erroneous oversimplification because the very nature of scientific work is related to generating simple hypotheses with their subsequent falsification in that context and bluntly my primary interest in the field of the collateral circulation was not initiated with a vision of eradicating the consequences of coronary artery disease cad by promoting the growth of natural bypasses the time for such sizeable ideas had passed in the 1970s with the start of the work by wolfgang schaper
