In this book Simon Bowmaker offers a remarkable collection of conversations with leading economists about research in economics. He has selected a broad sample of the great economists of our time, including people whose perspectives span most of the major subdivisions of economics research: from micro to macro, from theoretical to empirical, from rationalist to behavioral. From the foreword by Roger B. Myerson, University of Chicago US and 2007 Nobel laureate in economics: "The Art and Practice of Economics Research is the book I wish I had

when i was [growing up] as an economist for anyone who is or wants to be an economic researcher or anyone just interested in how economics [works] this is a terrific and inspirational resource [david k levine washington university in st louis us] it is hard to imagine an economist in the world who would not enjoy this book it is fascinating gripping and full of the wisdom imparted by age and by scholarly life[ups and downs] [andrew j oswald university of warwick uk] although each has followed his or her own road these scholars share a passion for economics and a commitment to the research enterprise the best economists lie sleepless gripped by their questions [joshua angrist massachusetts institute of technology us] this is a wonderful book of interviews with some of the most respected economists in the world it is full of insights into academic life and clearly conveys the joy of doing economics research [jon levin stanford university us] the relaxed frame of the interviews gives interested parties exciting insights into the thoughts and concerns of leading economists and might well inspire some of the best young minds to continue with economics in their later lives [ernst fehr university of zurich switzerland] the art and practice of economics research provides an in depth look into the research methods of leading economists from across the united states and europe this innovative volume contains 25 interviews with practicing economists presenting insightful personal accounts into an often misunderstood field contributors to this volume were asked to reflect on their own experience in economics research including their methods of working the process of scientific discovery and knowledge creation and the challenges of successfully disseminating their work the unique and compelling interview format showcases each contributor's personal connection to his or her work presenting a view of current economics research that is technical comprehensive and refreshingly human both students and current scholars in economics will find much to admire in this book's window into the inner workings of some of the brightest and best known minds in the field this volume would also make a great companion to the author's 2010 book the heart of teaching economics which showcases the personal experiences of teachers and professors of economics

this collection brings together the essays of one of the foremost american philosophers of economics cumulatively they offer fresh perspectives on foundational questions such as what sort of science is economics and how successful can economists be in acquiring knowledge of their subject matter

economics theory practice 11th edition by patrick j welch and gerry f welch connects theory to the practice of economics and the everyday world through examples and applications debates and critical thinking cases some that are classics in the field and others that are fresh and up to date its balanced coverage of microeconomics and macroeconomics flexibility in topic coverage order and the use of appendices and chapter sections to shorten or deepen course material offer a choice of levels and sequences for a course

interest in economics is at an all time high among the challenges facing the nation is an economy with rapidly rising unemployment failures of major businesses and industries and continued dependence on oil with its wildly fluctuating price economists have dealt with such

questions for generations but they have taken on new meaning and significance tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed 21st century economics a reference handbook is a must have reference resource key features provides highly readable summaries of theory and models in key areas of micro and macroeconomics helpful for students trying to get a big picture sense of the field includes introductions to relevant theory as well as empirical evidence useful for readers interested in learning about economic analysis of an issue as well for students embarking on research projects features chapters focused on cutting edge topics with appeal for economists seeking to learn about extensions of analysis into new areas as well as new approaches presents models in graphical format and summarizes empirical evidence in ways that do not require much background in statistics or econometrics so as to maximize accessibility to students

first published in 1987 professor o sullivan s work provides an in depth philosophical examination of the foundations of method in economics and other human sciences the argument is unabashedly dialectical in the great socratic platonic tradition and the reissue will be very welcome to all students of methodology in particular those students of economic methodology seeking a refreshing alternative to yet more mathematical game playing in an age dominated and perhaps to an extent perplexed by an ultimately non committal postmodernism the book provides a root and branch critique of the epistemological relativism which must lie at the root of the whole post modernist approach and in reasserting the fundamental importance not only for the methods of science but also for european civilisation of the pursuit of truth it takes a stance which is very much against the tide of the times a heterodox perspective is also provided and defended in detail regarding the real nature of economic methodology whereby it is shown that economics epitomises a teleological mode of explanation which is significantly different from the efficient causal modes of explanation of the natural sciences in fact economics is the ultimate subjectivist interpretative discipline in the methodological sense of max weber and alfred schutz a fact which has only been recognised and welcomed in the austrian school of economics

this book is a collection of essays that identify and analyze a new phase in thinking about the role of law in economic development and in the practices of development agencies that support law reform the authors trace the history of theory and doctrine in this field relating it to changing ideas about development and its institutional practices the essays describe a new phase in thinking about the relation between law and economic development and analyze how this rising consensus differs from previous efforts to use law as an instrument to achieve social and economic progress in analyzing the current phase these essays also identify tensions and contradictions in current practice this work is a comprehensive treatment of this emerging paradigm situating it within the intellectual and historical framework of the most influential development models since world war ii

mootz offers an antidote to the fragmentation of contemporary legal theory with a collection of essays arguing that legal practice is a

hermeneutical and rhetorical event that can best be understood and theorized in those terms this is not a modern insight that wipes away centuries of dogmatic confusion rather mootz draws on insights as old as the western tradition itself however the essays are not antiquarian or merely descriptive because hermeneutical and rhetorical philosophy have undergone important changes over the millennia to return to hermeneutics and rhetoric as touchstones for law is to embrace dynamic traditions that provide the resources for theorists who seek to foster persuasion and understanding as an antidote to the emerging global order and the trend toward bureaucratization in accordance with expert administration violent suppression or both

what new theories evidence and policies have shaped health economics in the 21st century editors mark pauly thomas mcguire and pedro pita barros assemble the expertise of leading authorities in this survey of substantive issues in 16 chapters they cover recent developments in health economics from medical spending growth to the demand for health care the markets for pharmaceutical products the medical workforce and equity in health and health care its global perspective including an emphasis on low and middle income countries will result in the same high citations that made volume 1 2000 a foundational text this book presents coherent summaries of major subjects and methodologies marking important advances and revisions serves as a frequently used non journal reference and introduces non economists to the best research in health economics
