the book is a collection of high quality peer reviewed research papers presented at international conference on information system design and intelligent applications india 2017 held at duy tan university da nang vietnam during 15 17 june 2017 the book covers a wide range of topics of computer science and information technology discipline ranging from image processing database application data mining grid and cloud computing bioinformatics and many others the various intelligent tools like swarm intelligence artificial intelligence evolutionary algorithms bio inspired algorithms have been well applied in different domains for solving various challenging problems

a transition to advanced mathematics a survey course promotes the goals of a bridge course in mathematics helping to lead students from courses in the calculus sequence and other courses where they solve problems that involve mathematical calculations to theoretical upper level mathematics courses where they will have to prove theorems and grapple with mathematical abstractions the text simultaneously promotes the goals of a survey course describing the intriguing questions and insights fundamental to many diverse areas of mathematics including logic abstract algebra number theory real analysis statistics graph theory and complex analysis the main objective is to bring about a deep change in the mathematical character of students how they think and their fundamental perspectives on the world of mathematics this text promotes three major mathematical traits in a meaningful transformative way to develop an ability to communicate with precise language to use mathematically sound reasoning and to ask probing questions about mathematics in short we hope that working through a transition to advanced mathematics encourages students to become mathematicians in the fullest sense of

the word a transition to advanced mathematics has a number of distinctive features that enable this transformational experience embedded questions and reading questions illustrate and explain fundamental concepts allowing students to test their understanding of ideas independent of the exercise sets the text has extensive diverse exercises sets with an average of 70 exercises at the end of section as well as almost 3 000 distinct exercises in addition every chapter includes a section that explores an application of the theoretical ideas being studied we have also interwoven embedded reflections on the history culture and philosophy of mathematics throughout the text
