a strong and fluent competency in mathematics is a necessary condition for scientific technological and economic progress however it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students performance lags far behind what should be expected and desired mathematics is indeed an important subject but is also important to be

able to use it in extra mathematical contexts thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues this book includes the revised papers presented at the nato arw information technology and mathematical problem solving research held in april 1991 in viana do castelo portugal which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities in recent years several committees professional associations and distinguished individuals throughout the world have put forward proposals to renew mathematics curricula all emphasizing the importance of problem solving in order to be successful these reforming intentions require a theory driven research base but mathematics problem solving may be considered a chaotic field in which progress has been quite slow

this book describes in detail a series of new strategies to solve problems mainly in mathematics new techniques are presented which have been tested in class by the author for over thirty years these techniques advance the state of the art in problem solving and extend existing methods of such great mathematicians and cognitive psychologists such as g polya h a simon w wickelgren and j greeno the book provides each technique with a detailed description and then illustrates it through a number of problems spanning a wide spectrum of mathematical areas

everyone encounters a wide range of difficulties mishaps and obstacles you can think of a problem as anything from a mild irritation like a sticky keyboard to a complete disaster that puts your job or even your life at risk a problem is a question or situation that causes doubt or perplexity or presents a difficulty it s something that needs to be corrected or overcome so you can achieve a desired state a problem often requires a unique or creative solution in other words you have a problem when you have a goal but can t readily see how to reach it when you have to think plan and devise suitable actions to solve the problem and achieve the goal barriers to achieving your goals can vary widely in kind and importance your problem might be as small as spilling coffee on your tie right before going into an important business meeting or it could be much more serious say if the laptop your presentation was on got stolen and you didn t have a backup but if you know just what to do in response to a problem it s no longer a real problem this is because there s no doubt or complexity involved for you the path of action you need to take to achieve your goal is clear problems come in two basic varieties the first is an unexpected disruption to the normal course of things for example your supplier fails to deliver crucial items or your car breaks down on your way to a conference you may or may not know what caused the disruption the second type is a gap between your current state and a desired state or goal if you aren t sure how to bridge that gap you have a problem for example you might want to find ways to meet a new consumer need

or you might want to improve your own efficiency in terms of managing your time meeting sales targets or designing products everyone needs to solve problems from the trivial to the life threatening at some point

you likely use problem solving every day it is often taken for granted people do not realize just how wonderful and important problem solving is most people do not even recognize it as a skill in fact most of the time problem solving is just second nature problem solving can actually be defined as an art the art of problem solving is something that we learn at a very young age it helps us through life and is something we could not live without being able to solve problems is a life skill it is important and it should be taken seriously to get the best results from it looking at problem solving as an art can help you to become more appreciative of it you can begin to use problem solving to its full potential and really respect that problem solving is important you just need to learn more about problem solving as a skill and an art problem solving is a fixture in life you have to be able to solve problems problems pop up every day sometimes they are small and sometimes they are large sometimes solving a problem is a matter of life and death and other times it is merely a matter of keeping your sanity regardless of why you need problem solving you cannot deny that you need it if you are a parent then problem solving is a skill you no doubt could not live without children are full of problems and as the parent it is up to you to help them find the solution sometimes you have to be creative because problems that come up can sometimes be quite difficult to solve without a little creative thinking the same can be said in business businesses have plenty of problems and it is up to the employees to find a way to solve those problems
