this is the story of david bohm s hitherto unpublished notes uncovered from a series of lectures given in israel in 1957 to a group of marxist physicists from the hashomer hatsair young guard movement the notes explore quantum theory and dialectical materialism as well as shedding light on the intellectual and emotional resources of his persistent rebellion against orthodoxies in science the discussion places his lectures notes in a wider historical scientific and philosophical context and traces bohm s intellectual development from an early attempt to better understand the copenhagen interpretation of quantum mechanics to his elaboration of an alternative causal interpretation based on the notion of hidden variables as the lecture notes strikingly illustrate dialectical materialism played a fundamental role for the further development of his understanding of quantum mechanics

bohm placed the notions of infinity of nature and the unity of opposites in the center of his natural philosophy drawing from the works of hegel marx engels and lenin the authors also examine bohm s legacy in the history of quantum mechanics and his contribution to preparing the second quantum revolution bohm s engagement with dialectical materialism and his role as a dissident to the orthodox interpretation of quantum mechanics were pivotal in bringing about the novel insights and technologies associated with this second quantum revolution during the 1960s bohm developed a growing interest in the nature of consciousness and engaged with the philosopher jiddu krishnamurti in spite of a seemingly fundamental break with earlier philosophical positions this new phase in bohm s intellectual odyssey was not completely unrelated to his fascination with and deep understanding of hegel s philosophy which the lecture notes amply document for the first time
