the future is urban indeed the battle for sustainable development will be won or lost in cities not a moment too soon then that urbanization is suddenly at the centre of global policy making in 2015 the governments of the un adopted the 2030 agenda for sustainable development and in 2016 they adopted the new urban agenda however the question of how these agendas will be pursued concretely remains unfortunately the prevailing model is rigidly technocratic charter of athens from 1933 the strict functionalist separation of activities that it prescribes still dominates planning practices worldwide the purpose of the quito papers and the new urban agenda is to start a discussion that both challenges this status quo and opens up new lines of enquiry it intentionally does not propose a manifesto made up of simplistic slogans and recommendations as cities in the 21st century are

more fragile and complex its content therefore is intentionally broad ranging from architecture planning and urban design to land ownership and regulation water management and environmental philosophy this multifaceted assembly of perspectives critiques the tenets of the charter of athens identify new trends and propose new insights on contemporary urbanization part one outlines the overall challenges facing cities in the 21st century and part two offers a number of conceptual frameworks and approaches for dealing with those challenges each part is also composed of a body of illustrated arguments synthesized from selectively abridged background papers from over 15 commissioned authors interspersed with in depth papers

what is leisure studies who are the key figures in the field how can we evaluate the relevance of concepts in the field this is the first full length dictionary of leisure studies it examines the key concepts assesses the work of central figures and helps students zero in on essential issues and conceptual distinctions the book provides an unprecedented critical survey of the field offers students authoritative comprehensive accounts of the basic concepts and leading figures provides students with core resources to write essays and pass exams written by teachers experienced with the needs of undergraduates and postgraduates in the field the book will be quickly recognized as a vital asset in making sense of leisure studies

compact living is sustainable living high density cities can support closer amenities encourage reduced trip lengths and the use of public transport and therefore reduce transport energy costs and carbon emissions high density planning also helps to control the spread of urban suburbs into open lands improves efficiency in urban infrastructure and services and results in environmental improvements that support higher quality of life in cities encouraging even requiring higher density urban development is a major policy and a central principle of growth management programmes used by planners around the world however such density creates design challenges and problems a collection of experts in each of the related architectural and planning areas examines these environmental and social issues and argues that high density cities are a sustainable solution it will be essential reading for anyone with an interest in sustainable urban development

the book is about future cities and possible scenarios for city futures a question central to this book is how to face urban challenges

while providing and safeguarding positive outcomes concerned with the improvement of the quality of urban life how can future cities be made more liveable sustainable and resilient how can cities continue to provide a wide range of opportunities for all necessities of life to tackle these complex questions the book includes a collection of 25 articles written by 37 emerging voices in urban design and research together they contribute from a diverse spectrum of interest expertise academic disciplines and practice they approach the built environment from a socio cultural respectively socio economic perspective from the viewpoint of urban policy and public health with environmental concerns for urban sustainability and circularity in mind and through the lens of urban computer and data science providing a take on urban digitalization and transformation of cities into smart cities together their contributions reflect the complexity and diversity of challenges and opportunities underpinning future cities future cities city futures intends to be a platform for trans disciplinary urban discourse

the study examines policy options relating to the establishment and further development of inland logistics centres and dry ports with an international role it provides the economic and social commission for asia and the pacific escap secretariat with a solid base to engage in further research and analysis in this area in order to present countries with policy options in developing inland logistics centres and dry ports it examines at the extent to which the concept of a seaport can be applied inland the publication also developed a cluster concept applied to industry in particular to the logistics and port industry it also provides governments and industry with an initial step by step process to evaluate the potential of future logistics centres and dry ports

the analysis of urban development of the past twenty years presented in this maiden edition of the world cities report shows with compelling evidence that there are new forms of collaboration and cooperation planning governance finance and learning that can sustain positive change the report unequivocally demonstrates that the current urbanization model is unsustainable in many respects it conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time to address issues such as inequality climate change informality insecurity and the unsustainable forms of urban expansion
