this book examines the nature and consequences of strategic competition between the us and china which affects the global security landscape and the emerging security architecture across the broader asia pacific region the author illustrates the evolution of sino us security interactions from the anti soviet alliance to temporary marginalization to eventual strategic competition and examines cases that could potentially escalate into greater conflicts the analysis offers tantalizing glimpses into both the dangers and promising opportunities presented by this strategic fork in the road making it of great interest to researchers and scholars in the fields of international relations and security studies

this collaborative study of the korean language diaspora looks at the history and present in regions with a significant korean population with reference to the economy politics education and society and considering the future the volume also examines government policies regarding korean language spread

one of the key elements in brazil s foreign policy is his challenge to the distribution of power on the international level the current system of world governance is considered unfavorable to developing countries and unfavorable to brazilian interests hence brazil s efforts with developing countries and its brics partners to work together to replace hegemony and unilateralism with a greater democratization of world governance

this report confirms and strengthens the conclusions of previous analyses that current pledges and commitments fall short of set goals it further says that as emissions of greenhouse gases continue to rise rather than decline it becomes less likely that emissions will be low enough by 2020 to be on a least cost pathway towards meeting the 2 c target as a result after 2020 the world will have to rely on more difficult costlier and riskier means of meeting the target the further from the least cost level in 2020 the higher these costs and the greater the risks will be if the gap is not closed or significantly narrowed by 2020 the door

to many options to limit temperature increase to 1.5 °C at the end of this century will be closed further increasing the need to rely on accelerated energy efficiency increases and biomass with carbon capture and storage for reaching the target
