for more than thirty five years the detail scale series of aviation publications was considered one of the best references on military aircraft available focusing on the physical details of the aircraft such as cockpits engines avionics and electronics armament landing gear and more each of the sixty nine titles in the series provided the most detailed look at a wide variety of aircraft dating from world war ii to the present the f3h demon in detail scale continues the well established and respected detail scale format as the first digital title in this series it covers

McDonnell's demon, a jet fighter flown by the U.S. Navy in the 1950s and 1960s, is covered in extensive detail. There are more than 340 photographs, and of these, more than 140 are photographs of details covering the demon inside and out. All of the detail photos are in color, and almost all were taken specifically for this publication. The 340 photographs are supplemented with more than 50 art profiles and illustrations, all of which were created just for this new title in the Detail Scale series. Every squadron to fly the demon is covered, along with information about their deployments aboard aircraft carriers of the Atlantic and Pacific fleets. As with all books in the Detail Scale series, a special section is provided for scale modelers that reviews the model kits available of the demon.

The Digital Detail Scale series continues with the newest title, F2h Banshee in Detail Scale Part 1: Prototypes through F2h 2 variants, covering the development history, color schemes, combat and operational use, and details of one of the most historically significant fighters to serve with the U.S. Navy and Marine Corps over the past 35 years. Detail Scale has published six monographs, 69 full-sized volumes, and now a total of four digital publication titles in the well-respected Detail Scale series, and one in the Colors/Markings series. F2h Banshee in Detail Scale Part 1 continues the series' focus on specific details of every aspect of this historic aircraft, but it includes so much more. It begins with a look at the developmental history of the Banshee, which started as an outgrowth of the McDonnell F4H Phantom, the first all-jet fighter to enter squadron use in the Navy. The Banshee advanced the design concept and would distinguish itself as only the second Navy jet aircraft to enter combat in Korea, following the Grumman F9F Panther. Each variant of the early Banshee is covered in its own section, including the XF2h 1 prototypes, the interim F2h 1 fighter, the definitive early variant in the F2h 2, and its derivatives: the nuclear-capable F2h 2B, the F2h 2N night fighter, and the F2h 2P photo recon version. This detailed look at the aircraft is followed by a chapter covering the operational use of the Banshee in the Korean War. The aircraft details chapter, long the hallmark of the Detail Scale series, provides detailed coverage of the cockpit, windscreen, canopy, fuselage, internal armament, wings, pylons, external stores, engine, landing gear, and tail of the aircraft, and contains more than 120 photos, mostly in color, that illustrate every aspect of the F2h. Another chapter covers the three official paint schemes worn by the early Banshees, from the gloss sea blue standard to the light gull gray over white to the overall white scheme worn by some aircraft near the end of their service. The Banshee Squadrons chapter contains photographs or profiles of Banshees in every Navy and Marine fighter, photo recon, reserve, and utility squadron that flew the aircraft, as well as test evaluation facilities. Finally, as with all books in the Detail Scale series, a detailed look at all of the scale model kits that have been released of the early Banshee variants is presented. This print version contains the majority of the content first published in our digital publication, with only part of the chapter dealing with Banshee squadrons being condensed into the Banshee Gallery chapter. F2h Banshee in Detail Scale Part 1: Prototypes through F2h 2 variants features 103 pages, 282 photos, more than 170 in color, color detail drawings, and 15 full-color aircraft profiles which accurately depict the Banshee in a variety of schemes as it was flown by Navy and Marine squadrons early in the jet fighter era.

The McDonnell F2h Banshee holds a unique place in the annals of United States naval aviation, like its contemporaries in the North American FJ Fury and the Grumman F9F Panther. The original design evolved into a significantly different aircraft in 1956. Detail Scale published F2h Banshee in Detail Scale Part 1: Prototypes through F2h 2 variants, that book covered the early Banshee variants that, alongside Grumman F9F Panthers, were among the first jet fighters to serve in large numbers and to see combat with the U.S. Navy and Marines. F2h 2 fighters and F2h 2P photo reconnaissance Banshees were used extensively by both services during the Korean War. This new title in the Detail Scale series picks up where that book left off and covers the larger F2h 3 and F2h 4 Banshees that were developed from the earlier Banshee variants, primarily to be all-weather interceptors because they were larger in size than the previous variants. The F2h 3 and F2h 4 became known as Big Banshees or more commonly Big Banjos, although the F2h 3 and F2h 4 were based on the original design and shared many commonalities with their predecessors. On the McDonnell production lines, there were noticeable and important differences, both physical and operational. This new title discusses these differences in considerable detail. We begin with a developmental history that traces how the all-weather Banshees were designed, developed, and produced to fill a pressing need for a jet fighter that could perform the fleet defense mission in any kind of weather, day or night. Changes made to the airframe and features that were added are discussed and illustrated. The second chapter focuses specifically on the F2h 3 and F2h 4 in

separate sections explaining the major difference between the two variants and covering the squadrons to which they were assigned a third section in the chapter is devoted to the canadian f2h 3s flown by the royal canadian navy the only non u s operator of any banshee variant numerous photographs and art profiles illustrate the markings used by many of the squadrons that flew the big banshees the use of several different paint schemes on the f2h 3 and f2h 4 is a very interesting story itself and it involves the navy s experiment with carrier based jet fighters in a natural metal finish this is covered in the third chapter and the reasons why the multiple schemes were developed tried and used operationally are explained and illustrated with both photographs and artwork the canadian paint scheme is also covered in this chapter as is the case with all titles in the detail scale series of publications the details of the aircraft are the primary focus the banshee details chapter includes more than 120 photographs and illustrations covering the aircraft extensively inside and out among the nine different sections of this chapter is one on the weapons certified for use on the f2h 3 and f2h 4 as well as the under wing stations on which they were carried a large majority of the photographs in the banshee details chapter were taken specifically for this publication the book concludes with a modelers section that reviews and illustrates the model kits of the big banshee that are available to the scale modeler the digital edition of f2h banshee in detail scale part 2 f2h 3 and f2h 4 variants has 147 pages with 192 photos 127 in color and over three dozen color profiles and illustrations
