schools of international economic theories by including an historical component that shows how each school of thought developed why it developed and what it has to say about the contemporary world this text examines a wide range of theories with an emphasis on the benefits of a pluralistic approach addressing schools of thought including classical neoclassical keynesian post keynesian marxian austrian institutional and feminist economics mercantilism and neo mercantilism alongside and in relation to each other this approach allows the scholarly value of each approach to be understood and appreciated and in doing so enables a greater understanding of the world economy this book is suitable for use as either a core or supplementary text on international economics and international political economy courses
