the ory ryan volume offers practical advice for developing using and grading classroom examinations the book encourages faculty to understand the potential benefits they can reap from appropriate and careful testing and grading practices and the role of testing in promoting quality teaching it is very helpful and well structured for those faculty who rely on traditional forms of assessment this book will help such faculty improve their test development and assessment skills as well as encouraging them to reflect on their own testing and grading practices patricia h wheeler in evaluation practice this book provides a thorough discussion of general testing and grading issues the topics one would expect to be covered are all addressed in a thorough and step by step manner i particularly like the activities

accompanying each chapter they are brief doable and inviting it would be particularly helpful for new faculty but experienced faculty might also benefit from the discussion of how to evaluate past exams and the pros and cons of various grading policies shirley ronkowski office of instructional consultation university of california santa barbara do you enjoy teaching students about your field but loathe the testing and grading process do you find yourself using the same kinds of tests that you had as a student aimed at helping faculty develop more effective assessment strategies ory and ryan s book provides practical suggestions for developing using and grading classroom exams through the use of detailed examples check lists exercises and lucid explanations this book will help you determine what content to include on an exam assess difficulty level of items write different kinds of test items multiple choice matching true false essay and short answer prepare a professional looking exam deal with cheating score different test items determine if various content areas were adequately taught help students review for an exam select a grading method and develop your own grading strategy if you want your exams and grades to be an accurate reflection of the material your students have mastered then this book is the resource for you

this fifth volume of pisa 2012 results presents an assessment of student performance in problem solving which measures students capacity to respond to non routine situations in order to achieve their potential as constructive and reflective citizens

complex problem solving cps and related topics such as dynamic decision making ddm and complex dynamic control cdc represent multifaceted psychological phenomena in a broad sense cps encompasses learning decision making and acting in complex and dynamic situations moreover solutions to problems that people face in such situations are often generated in teams or groups this adds another

layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions this framing of cps means that it is not a single construct that can be measured by using a particular type of cps task e g minimal complex system tests which is a view taken by the psychometric community the proposed approach taken here is that because cps is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other thus this research topic is aimed at showcasing the latest work in the fields of cps as well as ddm and cdc that takes a holist approach to investigating and theorizing about these abilities the collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine cps ddm and cdc this work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained

solving non routine problems is a key competence in a world full of changes uncertainty and surprise where we strive to achieve so many ambitious goals but the world is also full of solutions because of the extraordinary competences of humans who search for and find them
