excerpt from field and laboratory note book in physical geography laboratory work in physical geography has for some years been in a transitional stage that is now approaching but has not yet reached a regular routine similar to that of the chemistry or physical laboratory many teachers have been working out a series of laboratory exercises for their own classes some of these that have proven more or less successful have been published as an aid to other teachers professor merrill adds a manual to the list that appears to fill a need in the schools arising from the fact that some of the manuals already published are too elementary and some are too far advanced that is some of them require too much purely mechanical work giving the impression that the object is to occupy the hands of the pupil regardless of whether the exercise illustrates any principles or leads to any conclusions the other class of manuals presumes too much on the previous knowledge and experience of the pupil for the early years of the school this gap between the two kinds of manuals appears to be filled better by professor merrill s book than by any other that i have seen it likewise is wider

in its scope and covers the whole field of physical geography more thoroughly than any other it is a step in the right direction and i hope it may prove serviceable to all who use it about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
