this book provides a practical guide for students and practising teachers as to how concepts can form the basis of geography teaching this is particularly important at this time as the revised national curriculum for geography which takes effect from september 2008 has greatly reduced the prescribed content to be covered and instead emphasises that geography is underpinned by a small number of key concepts that provide the building blocks for curriculum planning the new national curriculum for geography identifies 7 concepts place space scale interdependence physical and human processes environmental interaction and sustainable development and cultural understanding and diversity and theses

areas are reflected in the book's table of contents this focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail this book will provide geography teachers with a theoretically robust and practical approach to curriculum planning based on the concepts that underpin the subject

this is the series blurb list all books together continuum studies in reflective practice and research is a new series of textbooks aimed at teaching students as with andrew pollard's books they use the idiom of reflective teaching in other words they avoid the two extreme views about learning to teach namely that it is best done simply through acquiring practical tricks of the trade without any theory or that it is best done applying systematized objective theory the distinctive feature of reflective teaching is that it encourages practitioners to develop by continually inter relating theory and research findings to their own practice situation and style these comprehensive textbooks provide an accessible guide to all those who are new to teaching in secondary schools covering all aspects of job from planning through to teaching and assessment the authors provide constructive accessible and above all practical advice to help subject teachers become more effective in their work
