guide 2 months ago and passed it on the first try as well i purchased the usgbc reference guide and mr chen s leed bd c exam guide i never opened the usgbc reference guide only studied from mr chen s study guide i followed mr chen s instructions and studied the guide for 2 weeks yes i have a full time job i did ignore the mnemonics not my learning style makes it more confusing to me the exam was not easy but i prepared and stuck to this material i am not a good test taker by no means i reviewed the technical data of the guide about 6 times and ignored everything else i had read or heard about the exam here s a piece of advice that i picked up from this book spend less time on practice tests and more time studying i have a subscription to a web exam simulator rated the best and only did about 100 questions until i realized that i was wasting my valuable time find a good book and stick to it this is also a great reference guide to use on everyday projects review the material try to understand it then try to memorize it through repetition i would like to shake your hand and say thanks again mr gang chen lobo excellent guide and good manual i passed the leed ap bd c and the leed ap id c exams this year and gang chen s books were my primary study material the books are easy to read and use gang chen provides study hints and guidance as well as an outline format that makes it easy for the reader to grasp key points he also provides an excellent review of the entire accreditation process which can save people time in personal research the books are more than study guides they are helpful as reference manuals because of the easy to follow format definitely a keeper in my bookshelf for future project reference karen m scott great resource for studying for the leed exam i have taken and passed the leed ap bd c exam and know what it takes as this author says it s not an easy exam and he is right what is critical to passing is having great teaching tools and this book is one of them he touches on every aspect of how to memorize data how questions are formed what to expect on tricky questions the content the test writers are looking for and every little detail you need to know when preparing for this exam i highly recommend this author s books if you are serious about passing any of the leed exams hopefully on the first try s jennifer sakiewicz leed bd c exam study guide gang chan s study guide is an excellent resource in preparing to take the leed ap bd c exam particularly if one follows the study recommendation made in the guide it does not replace the leed reference manual as the definitive source for technical information but more importantly provides a structure for the study of the information that is easily understood and when followed should provide good assurance of success in passing the exam the 1st time this is a keeper spock good summary of information to memorize for the test chen s exam guide is a good summary of the test relevant information in the leed reference guide he underlines specific information that is important to commit to memory for the test it is a good way to understand which information needs to be strictly memorized if you are preparing for the test in a short amount of time and have a good understanding of the leed process through your professional experience i passed the test with a very high score on my first try and i did use this guide one other the leed reference manual online sources a class and many years of personally working on and completing online leed submittals through my work the week before taking the test i used it to commit point values and those kind of details to memory denver not a bulky ref guide leed bd c exam guide does a great job in highlighting and summarizing the key points and concepts in usgbc ref guide if you only have limited amount of time for leed ap bd c exam preparation definitely go for this book metcalf very valuable guide i am a lighting designer and am
