an up to date survey of medieval islamic medicine offering new insights to the role of medicine and physicians in medieval
islamic culture

this book describes medieval islamic medicine and to explore a specific medical text on the prevention of bodily ills in

egypt by ali ibn ridwan a d 998 1068 it seeks to answer the following questions what did it mean to be a doctor in medieval islamic society what was the nature of the medicine that physicians practiced and what was the relationship between physician and patient this book describes medieval islamic medicine and to explore a specific medical text on the prevention of bodily ills in egypt by ali ibn ridwan a d 998 1068 it seeks to answer the following questions what did it mean to be a doctor in medieval i

in mamluks and animals veterinary medicine in medieval islam housni alkhateeb shehada offers the first comprehensive study of veterinary medicine its practitioners and its patients in the medieval islamic world with special emphasis on the mamluk period 1250 1517

in the early islamic world arabic erotic compendia and sex manuals were a popular literary genre although primarily written by male authors the erotic publications from this era often emphasised the sexual needs of women and the importance of female romantic fulfilment pernilla myrne here explores this phenomenon examining a range of arabic literature to shed fresh light onto the complexities of female sexuality under the abbasids and the buyids based on an impressive array of neglected medical religious legal literary and entertainment sources myrne elucidates the tension between depictions of women s strong sexual agency and their subordinated social role in various contexts in the process she uncovers a great diversity of approaches from the 9th to the 11th century including the sexual handbook the encyclopedia of pleasure jawami al ladhdha which portrayed the diversity of female desires asserting the importance of mutual satisfaction through lively poems and stories this is the first in depth comprehensive analysis of female sexuality in the early islamic world and is essential reading for all scholars of middle eastern history and arabic literature

medieval islamic medicine and medical luminaries while europe was passing through the dark ages a vibrant islamic civilization existed in the middle east driven by the search for knowledge scholars of different ethnicities and religious affiliations worked together to translate the available knowledge of the ancients greek roman indian persian etc into arabic added to it their own experiences preserved it in arabic and delivered it to western civilization during the renaissance in one volume adel k afifi md ms and ronald a bergman phd professors emeriti carver college of medicine university of iowa provide a detailed yet compelling look at the status of medicine of the ancients the pre early and late phases of islamic civilization and the transfer of the accumulated knowledge to the fledgling western civilizations medieval islamic medicine and medical luminaries will delight and fascinate health care professionals historians and casual readers of today s news so much of which includes information from the middle east

this is a study of madness in the medieval islamic world using a wide variety of sources historical literary and art the late michael dols explores beliefs about madness in islamic society and examines attitudes towards individuals afflicted by mental illness or disability the book demonstrates the links between christian and muslim medical beliefs and practices and traces the influence of certain christian beliefs such as miracle working on islamic practices it breaks new ground in analyzing the notions of the romantic fool the wise fool and the holy fool in medieval islam within the framework of perceptions of mental illness it shows that the madman was not regarded as a pariah an outcast or a scapegoat this is a comprehensive and original work with insights into magic medicine and religion that combine to broaden our understanding of medieval islamic society

examines beliefs and practices public health and plague in the medieval world

in sugar in the social life of medieval islam tsugitaka sato explores the actual day to day life in medieval muslim societies through different aspects of sugar drawing from a wealth of historical sources chronicles geographies travel accounts biographies medical and pharmacological texts and more he describes sugarcane cultivation sugar production the sugar trade and sugar's use as a sweetener a medicine and a symbol of power he gives us a new perspective on the history of the middle east as well as the history of sugar across the world this book is a posthumous work by a leading scholar of middle eastern and islamic studies in japan who made many contributions to this field

presents a selection of articles that illustrate the intellectual curiosity and theoretical vigour with which arabs and non arabs living in the medieval muslim world pursued scientific endeavours the focus is firmly on articles published during the last 20 years during which the discipline has enjoyed a new bloom

a brief introduction to the history of islamic medicine and its role in european history

this book collects and analyses the available biographical data on 600 jewish medical practitioners in the muslim world in the 9-16th centuries the biographies are based mainly on information gathered from the wealth of primary sources found in the cairo geniza letters commercial documents court orders lists of donors and muslim arabic sources biographical dictionaries historical and geographical literature the practitioners come from various socio economic strata and lived in urban as well as rural locations in muslim countries both the biographies and the accompanying discussion shed light on various views and aspects of the medicine practised in this period by muslim jews and christians as well as issues such as professional daily and personal lives successes and failures families jewish communities and inter religious affairs

the author of this text argues that although the islamic and the pre islamic hausa medical systems have much in common their theoretical and conceptual frameworks are different they operate from different understandings of the causes of disease and misfortune and of the appropriate methods to be employed to restore health or alleviate suffering the book also discusses another significant difference between the islamic and non islamic hausa medical systems the mode of preserving and communicating medical knowledge the early history of islamic medicine is also described and its theories concepts and historical developments are explored

a landmark work this history of medical thought from antiquity through the middle ages reconstructs the slow transformations and sudden changes in theory and practice that marked the birth and early development of western medicine editor mirko grmek and his contributors adopt a synthetic cross disciplinary approach that conveys a complete and varied vision of our medical past with attention to cultural social and economic forces as they have affected the historical flow of knowledge and the practice of medicine the various chapters by an international group of scholars isolate key ideas behind the history of medicine in the west charity and aid for the sick medical scholasticism the concept of disease intervention with surgery or drugs and the regimen of health throughout they highlight the links between socioeconomics in general with a focus on the physician and the scientific ideas beliefs and techniques behind prevailing medical practices the result is a multifaceted history unparalleled in its scope of the myriad influences on the development of medical thought and of the impact of that thought on other branches of knowledge and on human behavior across the centuries

acknowledgments abstracts and keywords introduction characteristics of the islamic civilization islamic characteristics of scientific trends qur'anic experimental method the elements of the scientific experimental method in the qur'an human reasoning al qiyās the impact of islamic medicine on modern civilization and islamic scientific heritage of medicine and pharmacy the impact of islamic political theory on modern civilization classical muslim scholars contribution to the fields of astronomy geography chemistry physics and mechanical engineering 'ilm al Ḥiyal glossary about the author index

how did pious medieval muslims experience health and disease rooted in the prophet s experiences with medicine and healing muslim pietistic literature developed cosmologies in which physical suffering and medical interventions interacted with religious obligations and spiritual health this book traces the development of prophetic medical literature and religious writings around health and disease to give a new perspective on how patienthood was conditioned by the intersection of medicine and islam the author investigates the early and foundational writings on prophetic medicine and related pietistic writings on health and disease produced during the islamic classical age looking at attitudes from and towards clerics physicians and patients sickness and health are gradually revealed as a social gendered religious and cultural experience

patients are shown to experience certain sensoria that are conditioned not only by medical knowledge but also by religious and pietistic attitudes this is a fascinating insight into the development of muslim pieties and the traditions of medical practice it will be of great interest to scholars interested in islamic studies history of religion history of medicine science and religion and the history of embodied religious practice particularly in matters of health and medicine
