to the philosophical writings but to Indian medical systems Ayurveda Arthastra of Kautilya and Kamasutra of Vatsyayana as well even great epics like Ramayana and Mahabharata are no exceptions. Veda culture involved verbal duals attacks and even violence of speech and all major religious systems old or modern were parties to it. This book also elucidates how Veda was vital and critical for the growth of our socio political fabrics. It shows how some of the major conflicts in philosophical systems were centred around Karma Janya choice between violence and non violence. Pravritti and Nivritti. It also presents the manifestations of Veda on a vast canvas during the nineteenth and twentieth centuries. Modern spiritual and religious gurus like Ramana Maharshi, J Krishnamurti and Vinoba Bhave were men of dialogues. Our scholars have applied the varied techniques of Veda against the philosophical and scientific systems of the West to prove them correct. This collector's issue should enthrall a wide audience of philosophers, scholars and believers in Indian knowledge systems.

Drawing on the underrepresentation of the Global South in global knowledge production with a focus on the existing inequalities, the book highlights the importance of postcolonial narratives within global southern epistemologies. In English language teaching ELT and teaching English to speakers of other languages, TESOL chapters consider the epistemological landscapes of these fields, their dedication to English teaching and English-related topics, and the intersection of the coloniality of language and the supremacy of English worldwide. The book explores the type of discussion that is needed to advance a more nuanced understanding of sociopolitical circumstances and how they shape our academic practices and theorizations of ELT and TESOL. In doing so, chapters examine the current geopolitics of knowledge that are found in journal publishing, citing how it favours the Global North and further exploring ways of decolonizing language practices, teaching approaches, and research cultures calling for greater visibility and recognition of southern ways of knowing within ELT and TESOL practice and research. The book will be an essential reading for scholars, researchers, and students of TESOL, ELT, applied linguistics, and multilingualism.

We live in a learning society. More and more research is being done on how people learn. This practical book looks at current theories of learning, how they have developed, and demonstrates how these can be put into practice. Education and learning are separate things. Learning is a human phenomenon essential to growth and development occurring throughout life with or without a teacher. The authors begin with a broad examination of the social changes that have made learning such a central concept in contemporary society and discuss the definition of learning. The current theoretical approaches to learning are then presented in clear, understandable terms with an in-depth discussion of the strengths and weaknesses of each approach. The book ends with an introduction to the literature and forms of adult learning and suggestions on how each type can be used in either an educational or human resource developmental setting.
