this paper analyzes the behavior of gross capital inflows across 34 emerging markets ems we first confirm that aggregate inflows to ems co move considerably we then report three findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across

borrower countries with market structure characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country's institutional fundamentals strongly affecting sensitivities countries relying more on international funds and global banks are found to be more sensitive to push factors our findings suggest that ems need to closely monitor their lenders and investors to assess their inflow exposures to global push factors

this book investigates the interrelationship between educational reforms and pedagogical and technological innovations as well as the implications of this relationship for the quality of human capital by analyzing recent educational reforms in russia and the us the authors shed new light on how these reforms may help or hinder innovations such as the introduction of computer technologies into classrooms new methods of teacher evaluation constructivist teaching methods and governance in public schools taking labor economics as a useful lens for conceptualizing the diffusion of innovation in the first part of the book the authors analyze how certain power arrangements can block educational innovations in schools in the second part they examine recent educational reforms in the us and russia the final part presents a vision of the next generation of educational reforms which may enable innovation diffusion rather than hamper it
