using variants of a modified version of dornbusch's model of price level and exchange rate dynamics it is demonstrated that satisfaction of the formal condition for existence of a unique non explosive solution of a linear rational expectations model with forward and backward looking dynamic processes equality of the number of stable roots with the number of independent backward looking processes does not guarantee the economic sensibility of this solution even if one accepts the usual arguments for excluding speculative babbles from the solutions of such models moreover satisfaction of the formal condition for existence of an infinity of non explosive solutions for such rational expectations models more stable roots than independent backward looking processes does not assure that any of these solutions is

economically sensible

here davidson challenges the 30 year dominance of the free market system over keynesianism he shows how the basic foundation of the chicago school underlying greenspan's policy decisions led to errors that propelled america into the worst economic crisis since the great depression
