since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the east asian region nowhere is this more apparent than when looking at popular culture where uneven but multilateral exchanges of japanese korean taiwanese hong kong and chinese products have led to the construction of an east asian popular culture this is both influenced by and in turn influences the national cultures and generates transnational co production and reinvention as east asian popular culture becomes a global force it is increasingly important for us to understand the characteristics of contemporary east asian popular culture and in particular its transnational nature in this handbook the contributors theorize east asian experiences and reconsider western theories on cultural globalization to provide a cutting edge overview of this global phenomenon the routledge handbook of east asian popular culture will be of great interest to students and scholars of a wide range of disciplines including cultural studies media studies communication studies anthropology sociology and asian studies in general

this book examines the vast and largely uncharted world of cultural creative city making in asia it explores the establishment of policy models and practices against the backdrop of a globalizing world and considers the dynamic relationship between powerful actors and resources that impact asian cities making cultural cities in asia approaches this dynamic process through the lens of assemblage how the policy models of cultural creative cities have been extracted from the flow of ideas and how re invented versions have been assembled territorialized and exported

this approach reveals a spectrum between globally circulating ideals on the one hand and the place based contexts and contingencies on the other at one end of the spectrum this book features chapters on policy mobility in particular the political construction of the web of communication and the restructuring or rescaling of the state at the other end chapters examine the increasingly fragmented social forces their changing roles in the process and their negotiations alignments and resistances this book will be of interest to researchers and policy makers concerned with cultural and urban studies creative industries and asian studies

this book examines different aspects of asian popular culture including films tv music comedy folklore cultural icons the internet and theme parks it raises important questions such as what are the implications of popularity of asian popular culture for globalization do regional forces impede the globalizing of cultures or does the asian popular culture flow act as a catalyst or conveying channel for cultural globalization does the globalization of culture pose a threat to local culture it addresses two seemingly contradictory and yet parallel processes in the circulation of asian popular culture the interconnectedness between asian popular culture and western culture in an era of cultural globalization that turns subjects such as pokémon hip hop or cosmopolitan into truly global phenomena and the local derivatives and versions of global culture that are necessarily disconnected from their origins in order to cater for the local market it thereby presents a collective argument that whilst local social formations and patterns of consumption and participation in asia are still very much dependent on global cultural developments and the phenomena of modernity yet such dependence is often concretized reshaped and distorted by the local media to cater for the local market
