exorbitant enlightenment compels us to see eighteenth and early nineteenth century literature and culture in new ways this book reveals a constellation of groundbreaking pre 1790s anglo german relations many of which are so radical

so exorbitant that they ask us to fundamentally rethink the ways we grasp literary and intellectual history especially when it comes to enlightenment and romanticism regier presents two of the great untold stories of the eighteenth century the first story uncovers a forgotten anglo german network of thought and writing in britain between 1700 and 1790 from this anglo german context emerges the second story about a group of idiosyncratic figures and institutions including the moravians in 1750s london henry fuseli and johann caspar lavater as well as the two most exorbitant figures william blake and johann georg hamann the books eight chapters show how these authors and institutions shake up common understandings of british literary and european intellectual history and offer a very different much more counter intuitive view of the period through their distinctive conceptions of language blake and hamann articulate in different yet deeply related ways a radical critique of instrumental thought and institutional religion they also argue for the irreducible relation between language and the sexual body in each case they push against some of the most central cultural and philosophical assumptions then and now the book argues that when taken seriously these exorbitant figures allow us to uncover and revise some of our own critical orthodoxies

despite its key role in the intellectual shaping of state socialism communist ideas are often dismissed as mere propaganda or as a rhetorical exercise aimed at advancing socialist intellectuals on their way to power by drawing attention to unknown and unexplored areas trends and ways of thinking under socialism the volume examines eastern europe and russian histories of intellectual movements inspired negatively as well as positively by communist arguments and dogmas through an interdisciplinary dialogue the collection demonstrates how various bodies of theoretical knowledge philosophical social political aesthetic even theological were used not only to justify dominant political views but also to frame oppositional and nonofficial discourses and practices the examination of the underlying structures of communism as an intellectual project provides convincing evidence for questioning a dominant approach that routinely frames the post communist intellectual development as a revival or at least as a return of the repressed intellectual traditions as the book shows the logic of a radical break suggested by this approach is in contradiction with historical evidence a significant number of philosophical theoretical and ideological debates in post communist world are in fact the logical continuation of intellectual conversations and confrontations initiated long before 1989
