excerpt from chemical calculations with explanatory notes problems and answers in the division of chemical teaching into departments which sooner or

later becomes necessary in a growing college the instruction of students in chemical calculations has for several years fallen to the lot of the author of this little treatise Mr Whiteley has also at the same time been engaged in laboratory teaching and in lecturing upon certain special branches of chemistry the text book which he now issues accordingly bears manifest evidence not only of his experience as a teacher but also of his being well in touch with the calculations which are required by chemical students for various purposes and with the chemical knowledge which elementary students may be assumed to possess as a matter of fact however the author has wisely decided to give a short summary of chemical facts or processes before proceeding to explain the methods of calculation which are applied to them laboratory students will find a most useful and convenient explanation of the methods of calculating the results of specific gravity determinations of analyses whether gravimetric volumetric or gasometric and of atomic and molecular weight determinations they will find these also brought up to date as regards the methods to which they refer about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
