centuries and are still revealing new facets of life and its functions the interest in them therefore continues even in the 21 st century though they are simple they provide a wealth of information on cell biology physiology biochemistry ecology and genetics and biotechnology they thus constitute a model system to study a whole variety of subjects all this provided the necessary impetus to write several valuable books on the subject of microbiology while teaching a course of microbial genetics for the last 35 years at delhi university we strongly felt the need for authentic compiled data that could give exhaustive background information on each of the member groups that constitute the microbial world
