what is an emotion our natural way of thinking about the standard emotions is that the mental perception of some fact excites the mental affection called the emotion and that this latter state of mind gives rise to the bodily expression the thesis on the contrary is that the bodily changes follow directly the perception of the exciting fact and that our feeling of the same changes as they occur is the emotion common sense says we lose our fortune are sorry and weep we meet a bear are frightened and run we are insulted by a rival are angry and strike the hypothesis here to be defended says that this order of sequence is incorrect that the one mental state is not immediately induced by the other that the bodily manifestations must first be interposed between and that the more rational statement is that we feel sorry because we cry angry because we strike afraid because we tremble and not that we cry strike or tremble because we are sorry angry or fearful as the case may be without the

bodily states following on the perception the latter would be purely cognitive in form pale colourless destitute of emotional warmth we might then see the bear and judge it best to run receive the insult and deem it right to strike but we could not actually feel afraid or angry the functions and acts of ordinary life it is true still remain to me but in every one of them there is something wanting to wit the feeling which is proper to them and the pleasure which follows them each of my senses each part of my proper self is as it were separated from me and can no longer afford me any feeling this impossibility seems to depend upon a void which i feel in the front of my head and to be due to the diminution of the sensibility over the whole surface of my body for it seems to me that i never actually reach the objects which i touch i feel well enough the changes of temperature on my skin but i no longer experience the internal feeling of the air when i breathe all this would be a small matter enough but for its frightful result which is that of the impossibility of any other kind of feeling and of any sort of enjoyment although i experience a need and desire of them that render my life an incomprehensible torture

in this urbane and witty book ronald de sousa disputes the widespread notion that reason and emotion are natural antagonists he argues that emotions are a kind of perception that their roots in the paradigm scenarios in which they are learned give them an essentially dramatic structure and that they have a crucial role to play in rational beliefs desires and decisions by breaking the deadlocks of pure reason the book s twelve chapters take up the following topics alternative models of mind and emotion the relation between evolutionary physiological and social factors in emotions a taxonomy of objects of emotions assessments of emotions for correctness and rationality the regulation by emotions of logical and practical reasoning emotion and time the mechanism of emotional self deception the ethics of laughter and the roles of emotions in the conduct of life there is also an illustrative interlude in the form of a lively dialogue about the ideology of love jealousy and sexual exclusiveness a bradford book
