the renewed interest in nuclear energy triggered by concerns about global climate change and security of supply which could lead to substantial growth in nuclear electricity generation enhances the attractiveness of fast neutron reactors with closed fuel cycles moving from the current fleet of thermal neutron reactors to fast neutron systems will require many decades and extensive rd d efforts this book identifies and analyses key strategic and policy issues raised by such a transition aiming at providing guidance to decision makers on the best approaches for implementing transition scenarios the topics covered in this book will be of interest to government and nuclear industry policy makers as well as to specialists working on nuclear energy system analyses and advanced fuel cycle issues

this book begins with an attempt to clarify the notion of problem definition the problem definition task is placed in policy making arenas in this context problems are implicitly and explicitly defined so as to guide future policy and to make sense out of past action the second part examines the taken for granted complexity of public problems a problem is rendered complex when solutions pursue conflicting or incompatible values a new direction has to do with placing public organizations in the center of a utilization formula in line with suggestions in the sociology of knowledge that view utilization as an organizational phenomenon

at the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought policy researchers call this process problem definition written for both scholars and students this book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics the authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like aids drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation by examining the way social problems are framed for political discussion the authors illuminate the unique impact of beliefs values ideas and language on the public policymaking process and its outcomes in so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research

in the late 1930s a number of american women especially those allied with various peace and isolationist groups protested against the nation s entry into world war ii while their story is fairly well known margaret paton walsh reveals a far less familiar story of women who fervently felt that american intervention was absolutely necessary paton walsh recounts how the united states became involved in the war but does so through the eyes of american women who faced it as a necessary evil covering the period between 1935 and 1941 she examines how these women functioned as political actors even though they were excluded from positions of power through activism in women s organizations informal women s networks and even male dominated lobbying groups in the great debate over whether america should enter the war some women favored aid to the allies not because they hoped for war but

because they hoped aid would forestall more direct u s involvement but also because they believed war was preferable to a nazi victory paton walsh shows that this activism involved some of the most prominent women of their day elizabeth cutter morrow whose son in law charles lindbergh was an isolationist spokesman supported the revision of the neutrality acts to allow the sale of arms to the allies and expressed her support in a national radio broadcast soon other women joined this debate esther brunauer of the aaup journalist dorothy thompson and organizations like the league of women voters and national women s trade union league broke from the pacifist tradition to advocate american aid for the allied cause focusing on the conflict in europe paton walsh shows how these women grasped the implications of the lend lease program for america s entry into the war but supported it nevertheless by late 1941 the women s division of the fight for freedom committee had been established no longer merely advocating aid to britain to keep american boys out of battle this organization supported direct american involvement in the war as a means of stopping nazi oppression while most historians have focused on women s pacifism paton walsh connects women more directly to world events and shows how those interventionists reformulated maternalist ideas to justify and explain their beliefs our war too is a story of american women trying to reconcile the irreconcilable to preserve both their principles and their peace it expands our understanding of women as political actors and thinkers about foreign policy as it sheds new light on american public opinion over the build up to the war
