keeping abreast of the major strides made in the field of neuropathology essentials of  
 diagnostic surgical neuropathology brings out its second edition with the aim of keeping the  
 neuroscience community updated with the new developments in neuropathology this second  
 edition comes close on the heels of the fifth edition of the who classification of central nervous  
 system tumours who cns5 which was published in 2021 this new edition has retained the  
 concise point wise format of the earlier edition making it a handy reference book while the  
 major changes in this edition are in neoplastic pathology this book also provides updates in the  
 pathology of non neoplastic lesions that need surgical intervention the highlights of the  
 neoplastic section are description of new tumour types and subtypes included in the who cns5  
 grading of tumours as per who cns5 relevant immune profile and diagnostic molecular  
 pathology for each tumour according to who cns5 essential and desirable diagnostic criteria as  
 defined by who cns5 in a tabular form at the end the salient features of the non neoplastic  
 section include new section on therapy related neuropathology recent classifications of vascular  
 malformations and epilepsy related lesions new section on infectious and inflammatory lesions  
 mimicking neoplasms new chapter on surgical pathology of spinal dysraphism and other neural  
 tube defects another important feature includes the addition of a new chapter on techniques viz  
 smears in the rapid diagnosis of central nervous system lesions challenges in the interpretation  
 of stereotactic biopsies

a major focus of the philosophy of medicine and in general of the philosophy of science has  
 been the interplay of facts and values nowhere is an evaluation of this interplay more important  
 than in the ethics of diagnosis traditionally diagnosis has been understood as an  
 epistemological activity which is concerned with facts and excludes the intrusion of values the  
 essays in this volume challenge this assumption questions of knowledge in diagnosis are  
 intimately related to the concerns with intervention that characterize the applied science of

medicine broad social and individual goals as well as diverse ethical frameworks are shown to condition both the processes and results of diagnosis this has significant implications for bioethics implications that have not previously been developed with this volume the ethics of diagnosis is established as an important branch of bioethics
