dx doi org 10 12946 gplh6 epubli de shop buch 53894 the spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today it still has not been the object of a focused inquiry against this background the book s proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue the aim of this volume however is not to offer abstract methodological considerations but rather to rely both on concrete studies out of which a reflection on this conjunction emerges as well as on the reconstruction of certain research lines featuring a spatiotemporal component this analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history indeed contrary to those historiographical attitudes reflecting a monistic conception of space and time as well as a eurocentric approach the book emphasises the need for a delocalized global perspective in general terms the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines the flexibility of those instruments that serve to create chronologies and scenarios as well as certain processes of adaptation of law to different times and into different spaces the spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes but also to achieve new and compelling interpretations of legal history as far as the relationship between space and law is concerned the book analyses experiences in which space operates as a determining factor of law e g in terms of a field of action for law moreover it outlines the attempted scales of spatiality in order to develop legal historical research with reference to the connection between time and law the volume sketches the possibility of considering the factor of time not just as a

descriptive tool but as an ascriptive moment quasi an inner feature of a legal problem thus making it possible to appreciate the synchronic aspects of the juridical experience as a whole the volume aims to present spatiotemporality as a challenge for legal history indeed reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline

this collection brings together a group of international legal historians to further scholarship in different areas of comparative and regional legal history authors are drawn from europe asia and the americas to produce new insights into the relationship between law and society across time and space the book is divided into three parts legal history and legal culture across borders constitutional experiences in global perspective and the history of judicial experiences the three themes and the chapters corresponding to each provide a balance between public law and private law topics and reflect a variety of methodologies both empirical and theoretical the volume highlights the gains that may be made by comparing the development of law in different countries and different time periods the book will be of interest to an international readership in legal history comparative law law and society and history

how was the banking union the most advanced legal and institutional integration in the single market created how does european law impact european integration to answer these questions this book provides a sweeping account of the evolution of european law it identifies five integration periods of the single financial market intertwined with the development of global finance from its origins through its expansion and crisis to the banking union each period is defined by innovations to deepen integration such as the single passport for financial services soft governance and comitology agencies or a single rulebook providing a far reaching explanation of the legal and institutional rationality of the european banking union this book demonstrates that the banking union is not an accident of history or simply the product of the existential crisis of the monetary union it has deep roots in the evolutionary process of european law and its drive towards supranational integration

this book advocates pursuing a regional approach to nuclear risk framework which it argues is more promising in the current scenario than the non achievable global regime in the development of international legislation on liability the nuclear energy sector represents an alternative approach to a transboundary liability regime building on this foundation and following the chernobyl accident international consensus was sought for a stronger transboundary legal regime in the event of a nuclear disaster however after sixty years of the existence of international nuclear liability laws and twenty five years after chernobyl the primary objectives of the conventions harmonization and a global regime remain unfulfilled further many countries are now creating or expanding nuclear programs without adequate transboundary legal protection in light of these issues a regional approach is an option that cannot be ignored given its rapidly expanding nuclear energy footprint south asia is in a unique position to adopt a regional mechanism the methodology adopted for the study in the book combines a literature review of international law on nuclear liability with an analysis of south asian nuclear energy programs and their international and national legal obligations a technical risk assessment study conducted to identify the level of transboundary nuclear risk within south asia is also presented this is followed by interviews with experts and policymakers to gauge the willingness of the south asian association for regional cooperation saarc community to respond to this shared regional concern
