the communicative engineer application oriented communication guidebook designed for engineering students and practitioners to improve their asking listening writing speaking and use of visuals practicing engineers spend about half their time communicating ideas facts and feelings but invest only a small part of their formal education learning how to communicate the communicative engineer addresses this gap when used as a textbook for students or resource for practitioners this book shows engineers in all disciplines how to use five communication modes asking listening writing speaking and visuals to participate in or lead successful engineering projects and achieve professional success and significance written by a highly qualified author with six decades of relevant experience the communicative engineer illustrates using examples the benefits of communication knowledge skills and attitudes ksa and the costs of poor communication presents communication fundamentals and goes well beyond theory by illustrating numerous applications describes the five modes of communication including their pros and cons and offers detailed advice on when and how to use them prepares readers to use or participate in various communication forms such as interviews letters meeting minutes memoranda oral

examinations proposals question and answer sessions reports resumes speeches and texts profiles excellent engineer communicators to serve as exemplars and references memorable speeches from within and outside of engineering to provide examples provides thorough documentation of content for readers who want to dig deeper into selective aspects of communication supplementing the scientific and technical education of engineers the communicative engineer offers engineering students and practitioners in all disciplines the parallel communication ksa needed to fully realize their potential given technology s ever increasing role in society the communicative engineer will be prepared to fill leadership roles

if it bleeds it leads the phrase captures television news directors famed preference for opening newscasts with the most violent stories they can find and what is true for news is often true for entertainment programming where violence is used as a product to attract both viewers and sponsors in this book james hamilton presents the first major theoretical and empirical examination of the market for television violence hamilton approaches television violence in the same way that other economists approach the problem of pollution that is as an example of market failure he argues that television violence like pollution generates negative externalities defined as costs borne by others than those involved in the production activity broadcasters seeking to attract viewers may not fully bear the costs to society of their violent programming if those costs include such factors as increased levels of aggression and crime in society hamilton goes on to say that the comparison to pollution remains relevant when considering how to deal with the problem approaches devised to control violent programming such as restricting it to certain times and rating programs according to the violence they contain have parallels in zoning and education policies designed to protect the environment hamilton examines in detail the microstructure of incentives that operate at every level of television broadcasting from programming and advertising to viewer behavior so that remedies can be devised to reduce violent programming without restricting broadcasters right to compete

this book looks at the relationship between questions of identity formation and modern practices in travelling and tourism unprecedented levels of mobility and international exchange over the last 100 years have raised questions about the stability of national and personal identities and new and creative patterns of behaviour and self realisation are now emerging due to the enormous commercial interests that lie behind the modern travel and tourism industries the volume will consider these issues and the challenges they create in various geographical contexts germany spain romania italy africa and concludes with a number of case studies from the portuguese context where the revenues from tourism are integral to its economy and a lifeline in the current economic crisis
