when middlebury writing professor don mitchell was approached by a biologist with the vermont fish and wildlife department about tracking endangered indiana bats on his 150 acre farm in vermont s picturesque champlain valley mitchell s relationship with bats and with government could be characterized as distrustful at best but the flying rats as mitchell initially thinks of them launched him on a series of improvements to his land that would provide a more welcoming habitat for the bats and a modest tax break for himself and his family whether persuading his neighbors to join him on a silent meditation pulling invasive garlic mustard out of the ground by hand navigating the tacit ground rules of buying an atv off craigslist or leaving just enough honeysuckle to give government inspectors something to find mitchell s tale is as profound as it is funny a journey that changes mitchell s relationship with chiroptera the land and ultimately his understanding of his own past ruminating on the nature of authority the purview of the state and the value of inhabiting one s niche mitchell reveals much about our inner and outer landscape in this perfectly paced and skilled story of place

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

this book is based upon more than two years of ethnographic fieldwork and personal experiences with the teetł it gwich in community in northern canada the author provides insight into gwich in understandings of life as well as into historical and political processes that have taken place in the north he outlines the development of an

educational approach towards conducting ethnography and writing anthropological literature starting with the premise you have to live it the book focuses on ways of knowing and collaboration through learning and being taught by interlocutors building on the work of tim ingold loovers investigates the notion of reading life land water and weather as well as texts and analyses the reading of texts as acts of conversations or correspondences

trees are now in the public eye as never before the threat of tree diseases the felling of street trees and the challenge of climate change are just some of the issues that have put trees in the media spotlight at the same time the trees in our parks gardens and streets are a vital resource that can deliver environmental social and economic benefits that make our towns and cities attractive green and healthy places ever since roman times when amenity trees were first planted in britain caring for those trees has required specialist skills this is mainly because of the challenges of successfully integrating large trees into the urban environment and the risks involved in working with them often at height and in close proximity to people buildings and roads but who are the people with the specialist expertise to care for our amenity trees while professionals such as horticulturists landscape architects conservationists and foresters have a role to play it is the arboriculturists who are the tree experts for centuries arboriculture was often synonymous with forestry or considered an aspect of horticulture until it emerged in the nineteenth century as a separate discipline there are now some 22 000 people employed in britain s arboricultural industry including practical tree surgeons and arborists local authority tree officers and arboricultural consultants this is the first book to trace the history of britain s professional tree experts from the roman arborator to the modern chartered arboriculturist it also discusses the influences from continental europe and north america that have helped to shape british arboriculture over the centuries the tree experts will have particular appeal to those interested in the natural and built environment heritage landscapes social history and the history of gardening
