oliver taplin's seminal study was revolutionary in drawing out the significance of stage action in greek tragedy at a time when plays were often read purely as texts rather than understood as performances professor taplin explores nine plays including aeschylus agamemnon and sophocles oedipus the king the details of theatrical techniques and stage directions used by playwrights to highlight key moments are drawn out and related to the meaning of each play as a whole with extensive translated quotations the essential unity of action and speech in greek tragedy is demonstrated now firmly established as a classic text greek tragedy in action is even more relevant today when performances of greek tragedies and plays inspired by them have had such an extraordinary revival around the world

astyanax is thrown from the walls of troy medeia kills her children as an act of vengeance against her husband aias reflects with sorrow on his son s inheritance yet kills himself and leaves eurysakes vulnerable to his enemies the pathos created by threats to children is a notable feature of greek tragedy but does not in itself explain the broad range of situations in which the ancient playwrights chose to employ such threats rather than casting children in tragedy as simple figures of pathos this volume proposes a new paradigm to understand their roles emphasizing their dangerous potential as the future adults of myth although they are largely silent passive figures on stage children exert a dramatic force that transcends their limited physical presence and are in fact theatrically complex creations who pose a danger to the major characters their multiple projected lives create dramatic palimpsests which are paradoxically more significant than their immediate emotional effects children are never killed because of their immediate weakness but because of their potential strength this re evaluation of the significance of child characters in greek tragedy draws on a fresh examination of the evidence for child actors in fifth century athens which concludes that the physical presence of children was a significant factor in their presentation however child roles can only be fully appreciated as theatrical phenomena utilizing the inherent ambiguities of drama as such case studies of particular plays and playwrights are underpinned by detailed analysis of staging considerations opening up new avenues for interpretation and challenging traditional models of children in tragedy
