it is evident that urban education has become the central focus of
educators at the present time in the u s for example almost one third
of all school age children attend schools in large urban school
districts it is in these urban schools where the diversity of cultures
and languages is highest and where student learning is most
problematic what has emerged from recent work to improve urban schools
is the insight that there is no one size fits all panacea rather we
have discovered that the local context shapes in critically important

ways what will be effective at the school level the universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the international handbook of urban education an important focus of the international handbook of urban education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region an important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education
