a content analysis of facebook profiles of undergraduate students examined the profile pictures and status updates to reveal how self identified males and females construct their identity in this online environment the findings revealed that perhaps users view statuses and profile pictures differently in regards to strategies of self presentation however some findings also revealed that identity on facebook is constructed using stereotypical ideas of gender although studies have been done on social networking sites sociological concepts have been greatly ignored in regards to facebook more research needs to be done especially in

the field of sociology to examine how this novel social environment is affecting the identity construction and social interaction of people today

facebook is the most popular online social network originally developed to connect college students facebook is used by different people from around the world amounting to its 1 39 billion users the website gained popularity by providing an easy means of communication between people instead of having to send several messages to different people about how you are doing you can post one update on facebook to alert everyone it also allows you to share pictures and other media with multiple people instantaneously creating simpler and faster communication more and more people join the network daily and the fastest growing demographic of users are in the age group of 55 and over proving that facebook is no longer a network limited to teenagers and young adults people of all age groups and backgrounds recognize the value in the services it provides which is why facebook has become a social buzzword because of its prominence in modern culture and interaction
