democracy may be one of the most admired ideas ever concocted but what if it s also one of the most harebrained after many years of writing about democracy for a living david harsanyi has concluded that it s the most overrated overused and misunderstood idea in political life the less we have of it the better democracy is not synonymous with freedom it is not the

opposite of tyranny in fact the founding fathers knew that democracy can lead to tyranny that's why they built so many safeguards against it into the constitution democracy harsanyi argues has made our government irrational irresponsible and invasive it has left the american people with only two options domination by the majority or a government that can't possibly work the modern age has imbued democracy with the mystique of infallibility but harsanyi reminds us that the vast majority of political philosophers including the founders have thought that responsible limited government based on direct majority rule over a large let alone continental scale was a practical impossibility in the people have spoken you'll learn why the framers of our constitution were intent on establishing a republic not a democracy how democracy undermines self government how shockingly out of touch with reality most voters really are why democracy is an economic wrecking ball and an invitation to a politics of envy and corruption how the great political philosophers from plato and aristotle to burke and toqueville predicted with uncanny accuracy that democracy could lead to tyranny harsanyi warns that if we don't recover the founders republican vision democracy might very well spell the end of american liberty and prosperity

examines why the government failed those left stranded in new orleans in the aftermath of hurricane katrina and discusses the importance of churches and the private sector in responding to major disasters

why should america try to be more like countries that are worse in nearly every way europe has been declining under the weight of its antiquated institutions economic fatigue moral anemia and cultural surrender yet american politicians technocrats academics and pundits argue with increasing popularity that americans should look across the atlantic for solutions to the nation's problems including on issues like health care the welfare state immigration and a bloated bureaucracy in eurotrash david harsanyi argues we are looking in the wrong place by every economic and societal measure the united states is more tolerant than europe it is more welcoming of immigrants but also far more successful at assimilating them minorities do far better in united states our economy is dominant only one european company appears in top 10 corporate powerhouses in the world and only seven in the top 50 americans make up nearly half of the list americans are far more charitable and

happier than europeans our slightly lower life expectancy and our slightly higher infant mortality rate are not a result of substandard care but a statistical misunderstanding based on the fact we treat every life as one worth saving in this biting fast moving and well researched polemic harsanyi debunks prevailing notions about european supremacy and makes an unapologetic case for american exceptionalism offering insight and reasoned arguments to counter current policy prescriptions
