Education has undergone a series of changes based on the new technologies, strategies, and best practices that have been developed in recent years. Specifically, the way various subjects are taught has developed considerably as education turns toward a more digital approach. Geography education is no different and has had to adjust to these innovative practices in order to provide students with the best possible curricula. Didactic strategies and resources for innovative geography teaching presents educational strategies and resources to promote cross-disciplinary approaches to teaching geographic knowledge and skills. The book also discusses how geography education boosts essential cognitive and attitudinal processes in personal development, fosters critical thinking, and builds a society committed to its environment. Covering key topics such as mobile learning, natural learning environments, and geographic information systems, this reference work is ideal for teachers, geographers, researchers, scholars, academicians, practitioners, instructors, and students.

With the rapid changes in the social, political, economic, and technological landscape around the world today, learners face a more globally competitive job market after leaving school. The 21st century, which is characterized by the emergence of knowledge-based societies, expects learners to be comfortable in dealing with ambiguities and complexities in the real world and to be able to use knowledge as a tool at their workplace. This book will help readers develop an in-depth understanding of authentic problem solving and learning and how it can be used to make a difference in their school or learning communities for the development of 21st-century competencies. Comprising 20 chapters written by Singapore-based and international authors, the book is organized into three themes: authentic problems, authentic practices, and authentic participation. It details innovative school practices, e.g., productive failure concerning the design of problems, learning activities, learning environments, and ICT tools for authentic problem solving and learning, along with theoretical explanations of authentic learning processes and outcomes. The book also elucidates how students learn by generating and exploring solutions to complex problems and which cognitive functions are needed at different stages of problem-based learning.
