psychology and philosophy have long studied the nature and role of explanation more recently artificial intelligence research has developed promising theories of how explanation facilitates learning and generalization by using explanations to guide learning explanation based methods allow reliable learning of new concepts in complex situations often from observing a single example the author of this volume however argues that explanation based learning research has neglected key issues in explanation construction and evaluation by examining the issues in the context of a story understanding system that explains novel events in news stories the author shows that the standard assumptions do not apply to complex real world domains an alternative theory is presented one that demonstrates that context involving both explainer beliefs and goals is crucial in deciding an explanation's goodness and that a theory of the possible contexts can be used to determine which explanations are appropriate this important view is demonstrated with examples of the performance of acceptor a computer system for story understanding anomaly detection and explanation evaluation

the premise of dimensions of learning an instructional framework founded on the best of what researchers and theorists know about learning is that five types or dimensions of thinking are essential to successful learning these are 1 positive attitudes and perceptions about learning 2 thinking involved in acquiring and integrating knowledge 3 thinking involved in extending and refining knowledge 4 thinking involved in using knowledge meaningfully and 5 productive habits of mind dimensions of learning is a valuable tool for reorganizing curriculum instruction and assessment the authors discuss each of the five dimensions in detail and describe hundreds of teaching strategies that support them for example how to help students construct meaning for declarative knowledge internalize procedural knowledge and see the relevance of what they are expected to learn the authors provide many examples at the elementary and secondary classroom levels teachers of grades k 12 can use this information to improve teaching and learning in any content area

more than a decade has passed since the first international conference of the learning sciences icls was held at northwestern university in 1991 the conference has now become an established place for researchers to gather the 2004 meeting is the first under the official sponsorship of the international society of the learning sciences isls the theme of this conference is embracing diversity in the learning sciences as a field the learning sciences have always drawn from a diverse set of disciplines to study learning in an array of settings psychology cognitive science anthropology and artificial intelligence have all contributed to the development of methodologies to study learning in schools museums and organizations as the field grows however it increasingly recognizes the challenges to studying and changing learning environments across levels in complex social systems this demands attention to new kinds of diversity in who what and how we study and to the issues raised to develop coherent accounts of how learning occurs ranging from schools to families and across all levels of formal schooling from pre school through higher education this ideology can be supported in a multitude of social contexts the papers in these conference proceedings respond to the call

this study guide should help readers develop the test taking skills and strategies they need to pass the national athletic trainers association nata board of certification exam it presents practice questions and general information about the exam
